# Welcome to quality, convenience and service exclusively for the personal computer user!

Inmac, one of the industry's largest sources for computer supplies and accessories, is proud to present a new catalog prepared expressly for you, the personal computer user.

As you shop through this publication, you'll find a broad selection of high quality products designed, tested and proven for use with personal computers.

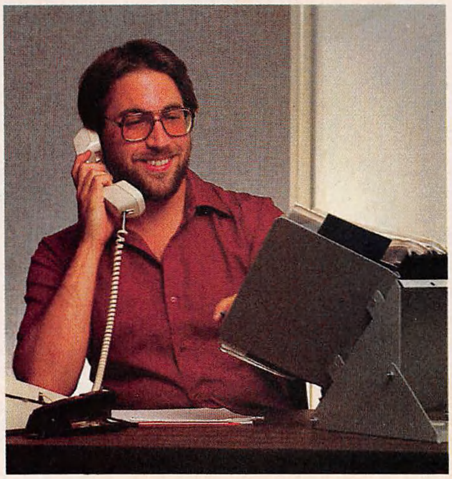
**Our quality products are guaranteed to perform.**

When you order from Inmac, you will be served from regional centers staffed by professionals who know personal computers—and who are dedicated to serving the unique needs of today's PC user.

Ask them questions. Share your PC problems. And get their advice. They'll be happy to help you.

When your delivery arrives, it always includes our guarantee of your complete satisfaction.

Try it for 45 days. If it's not satisfactory in every way, return it for an immediate, no questions asked refund.



*Our knowledgeable sales representatives are ready to help you order exactly what you want and need to get the most from your personal computer!*

**To use your new INMAC Personal Computer Catalog, turn to the three-way index on the facing page.**

If you're looking for specific items, you'll find them in the product listings. If you want to see what's available exclusively for your PC, check the manufacturer's index.

And if you're interested in comparing products for features and prices, our category listing in the right column will guide you.

We'll be happy to be of service to you today, so call now!

*For the industry's finest flexible diskettes, INMAC PLUS, and a wide choice of reliable media storage systems, turn to pages 9-15.*

*To get the most from your printer, rely on INMAC's complete selection of high quality ribbons, printwheels, thimbles and paper on pages 16-25.*

*For data communications with a business associate in your office or in another part of the country, you'll need a modem from INMAC's versatile selection on pages 26-27.*

**You'll get fast friendly service from your nearby Inmac Branch office.**

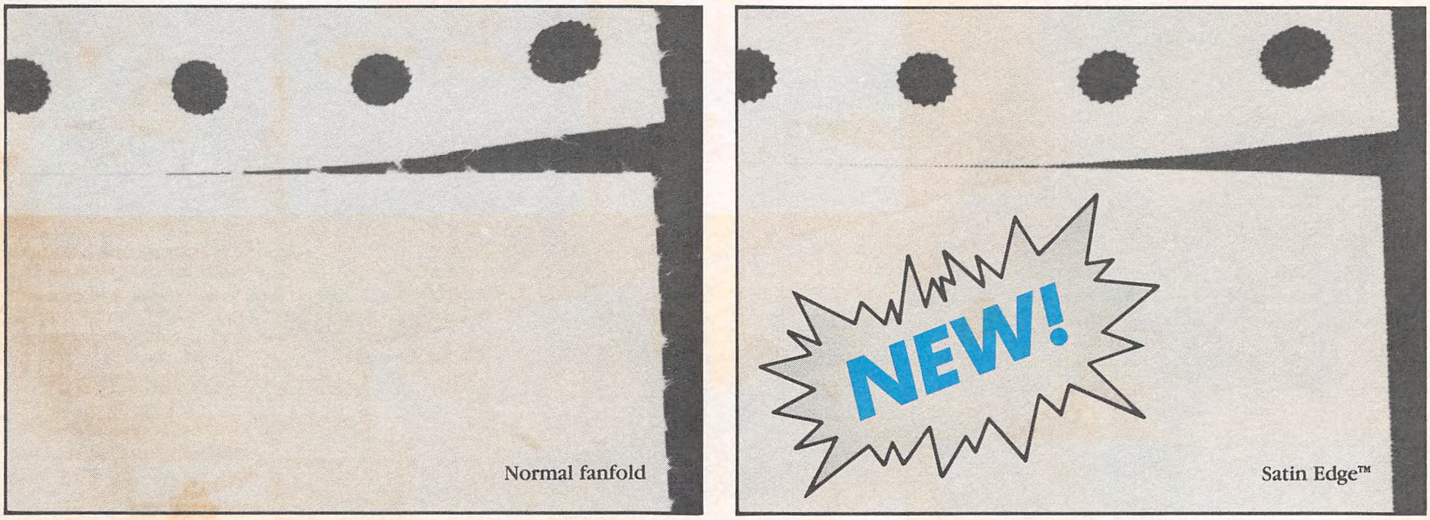
# Introducing Inmac Satin Edge™ Continuous Form Stationery.

# Look at the Difference!



With its ultra-fine perforations (72 ties per inch), Satin Edge eliminates the impersonal, "computerized" look of ragged-edge computer fanfold paper.

If you're using individual sheets of stationery to make your computer-generated letters look more personal, you're wasting your time. With new Inmac Satin Edge™ fanfold paper, you can make your form letters, reports and other documents look as if they were prepared *individually*. And with no extra effort on your part.

Inmac Satin Edge is unlike any computer fanfold paper you've ever seen. When you detach the carrier strips, you're left with a clean, neat edge—a sheet of paper with the look and feel of fine stationery.

WORKS WITH ANY PIN-FED PRINTER.

Satin Edge paper is compatible with *any* pin-fed printer. So you can give your business correspondence a more professional image, without giving up the speed, convenience and economy of printing on fanfold paper.

Order a carton of new Inmac Satin Edge continuous form stationery today, and get rid of that impersonal, "computerized" look forever!

**INMAC SATIN EDGE CONTINUOUS FORM STATIONERY**

| Order No. | Description | Sheets Per Carton | Case Weight | Price Per Carton |
|---|---|---|---|---|
| 4582 | 20 lb. Artic White | 1000 | 12 lbs. | (see below) |

# INMAC PLUS™ PERSONAL PACK.

## Personal computer users can now get our lifetime diskette in a handy 5 pack.

INMAC PLUS
Lifetime Guarantee
Instructions
Inmac

*Each Inmac Plus diskette is numbered and registered so performance can be easily tracked.*

*Durable plastic pack that's perfect for accessing, organizing and shipping.*

*Our blue reinforced ring protects center hole from dents, burrs and tears.*

*Pressure-sensitive labels make it easy to identify disk contents.*

*Inmac Plus Diskettes are backed by the strongest guarantee in the industry. If one ever fails, we'll replace it free.*

Introducing Inmac Plus quality diskettes in a personal, portable 5 pack.* Five of our original lifetime diskettes in a durable pack that's great for storage and protection. It's an ideal opportunity for personal computer users to now discover the reliability and performance of these top of the line diskettes.

**Inmac Plus: you'll never have to buy another replacement disk—ever.**

Trust the diskette that's guaranteed to deliver flawless performance for life—Inmac Plus. Why take risks when a single disk failure can cost you hours of programming time and volumes of key data.

Each disk is individually registered and tracked through manufacturing; a process subjecting each disk to 32 separate quality tests. And our testing exceeds industry standards to ensure compatibility on the widest number of drives. We even conduct a 100% visual inspection after certification.

Inmac Plus diskettes have a flexible coating that resists flaking. A specially lubricated surface that can never wear off. And our blue reinforced hub that protects against "center-hole" wear.

Our guarantee—the strongest in the industry. An Inmac Plus diskette will perform to your complete satisfaction for as long as you own it—or we'll replace it. Free.†

**Our new pack is another good reason to try Inmac Plus diskettes.**

This durable pack provides your diskette maximum protection against moisture, dust and other contaminants. It's also perfect for accessing, organizing and shipping your Inmac Plus diskettes. And the leather-like finish will add an attractive touch to your data library.

*Your storage pack, like our quality diskettes, also comes with a lifetime guarantee of performance.†*

So order your personal pack of Inmac Plus diskettes today and discover the reliability and performance of the original lifetime disk. **See page 10** for more information on our 10 pack which is available in a wider product offering.

| Inmac Plus 5 Pack Order # | Description | Price Per Disk 5-15 | 20-50 |
|---|---|---|---|
| **9898-P*** | 5¼," Single Side, Double Density, Soft Sector | 6.40 | 5.80 |
| **9890-P**** | 5¼," Double Side, Double Density, Soft Sector | 8.90 | 8.05 |

*For Altos 5-15D, Apple, Atari 800 (810 drive), Commodore PET, 3030, CBM 2030, 2031, 2040, 3040, 4040, Franklin Ace 100 and 1000, IBM (Single Side drive), Osborne, Radio Shack TRS 80-1 or -3 and Shugart SA 400.

**Cromemco Z2H, C10, CS1, D2E and CS5, IBM (Dual Side), Shugart SA 450 and Wang's Wangwriter.

(See page 10 for more information)

---

*The 5 pack is only available with product numbers 9890-P and 9898-P.

†Understandably, we cannot guarantee against damage resulting from neglect or abuse. Nor do we assume responsibility for any consequential damages.

## NEW FROM INMAC

# PC users! This is the workstation you've been dreaming about: It has everything!

No ordinary office furniture even comes close to matching the neat, convenient way our MicroMaster Mobile Station handles your personal computer.

It's the first truly *complete* PC support system—available only from Inmac—and it's so well-made, we guarantee it for life!

**Designed to minimize stress.**

The 26½" high worksurface puts your keyboard at just the right height.

An optional backshelf mounts on the left or right side of the station. It quickly adjusts your monitor to any comfortable level. You can even tilt it to keep your CRT free of stress-causing glare. And it's wide enough to hold documentation.

*The mobile micro station makes it easy for several users to share the same computer.*

Optional side extensions provide additional worksurface and support for components like modems, T-switches and hard disk drives.

**Simplifies paper handling.**

If you've ever had printout snaking all over your desk or crawling back into your printer, you'll really appreciate how this mobile PC station handles paper!

Two slots let paper pass from below to your rear- or bottom-feed printer.

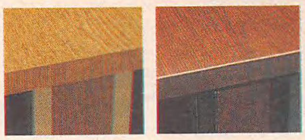
A third slot carries paper to the optional paper catcher mounted beneath or behind the worksurface. Neat and easy!

By mounting the basket below, you can push the station against the wall to save space and still access printout easily.

**Hidden channels keep cables tidy.**

Cables and cords won't get in your way anymore. They're carried through slots in the worksurface where they're tucked out of sight in special troughs.

*Choose from attractive putty with an oak-laminate worksurface or black with walnut laminate.*



Power cords can be routed invisibly down channels built into the leg, or for greater convenience and safety, plug your components into our optional power strip with automatic surge supression.

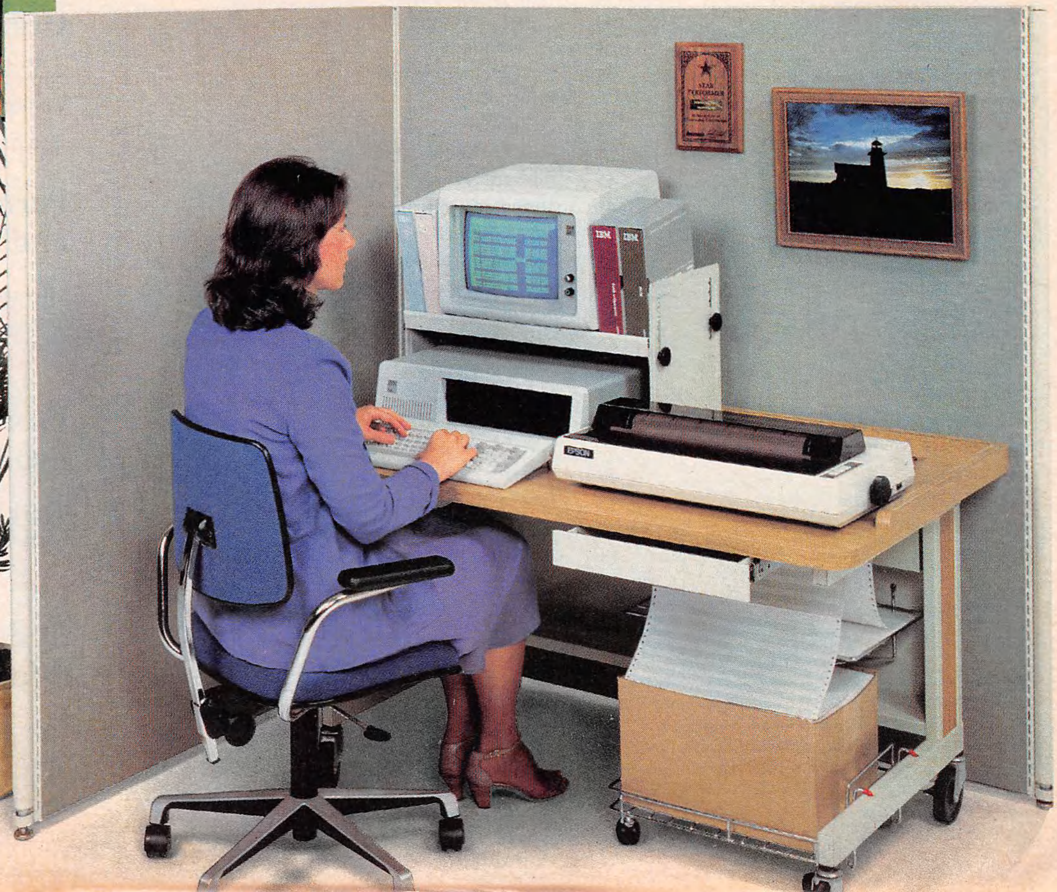
Mounted under the worksurface, the strip gives you one-switch control over six *safe* outlets right where you need them.

**Like an "office on wheels"!**

When you want someone else to use your computer, you don't have to touch a single cable. Just unplug *one* power cord (if you use the optional power strip) and roll the whole hooey to the next user.

You can even leave your printer loaded. An optional paper dolly attaches to the stand and rolls on its own ball casters!

The mobile micro station assembles in 25 minutes with a screwdriver.



*Watch productivity increase when you're comfortable and professionally organized.*

**An Inmac Exclusive!**

Convenient Order Form on Page 48

# NEW • PRODUCTS

## NEW FROM INMAC

It comes with 4" heavy duty ball-bearing wheels that glide smoothly over any surface—even bumpy elevator openings.

**Try it for 45 days and see!**

Once you experience the pleasure of using the mobile micro station, we're sure you'll want to own one.

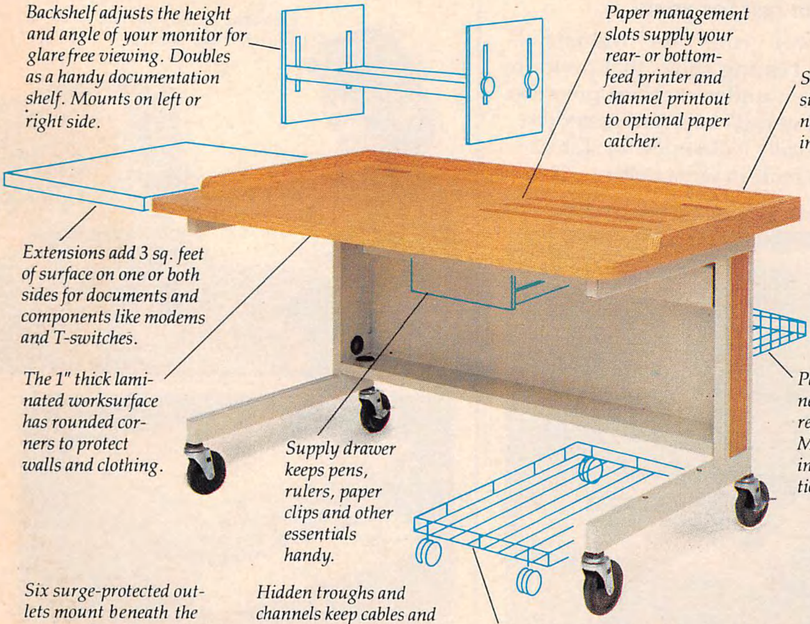
That's why we invite you to try it out for 45 days. If you change your mind, send it back for a prompt refund.

Choose from the options listed below. We'll ship your order within 24 hours.

### Protect your equipment!

"Garbage" output, memory loss, fried circuits—experts estimate up to 70% of these typical computer malfunctions are caused by power surges that occur daily in your 120 volt AC line.

Order our optional surge protecting power strip for your PC station and relax ... it suppresses voltage surges automatically!



*Backshelf adjusts the height and angle of your monitor for glare free viewing. Doubles as a handy documentation shelf. Mounts on left or right side.*

*Paper management slots supply your rear- or bottom-feed printer and channel printout to optional paper catcher.*

*Safety railing on 3 sides keeps components secure while in transit.*

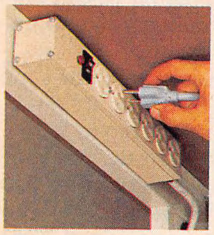
*Extensions add 3 sq. feet of surface on one or both sides for documents and components like modems and T-switches.*

*The 1" thick laminated worksurface has rounded corners to protect walls and clothing.*

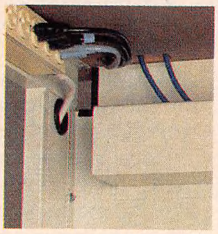
*Supply drawer keeps pens, rulers, paper clips and other essentials handy.*

*Paper catcher neatly stacks and refolds printout. Mounts on back or inside of workstation to save space.*

*Six surge-protected outlets mount beneath the worksurface. One switch powers your whole system; when you want to move, pull one plug!*



*Hidden troughs and channels keep cables and power cords out of your way and safe from accidental yanks that can wipe out data.*



*Handy paper dolly slides out for easy loading, locks back into place and rolls with the stand!*

*Left or right side extensions attached by 1" thick steel brackets safely support up to 60 lbs.*

### Specially designed microprinter stand saves office space, can be rolled away

With microcomputer equipment getting smaller and more compact, here's a printer stand built for today's printer—and tomorrow's!

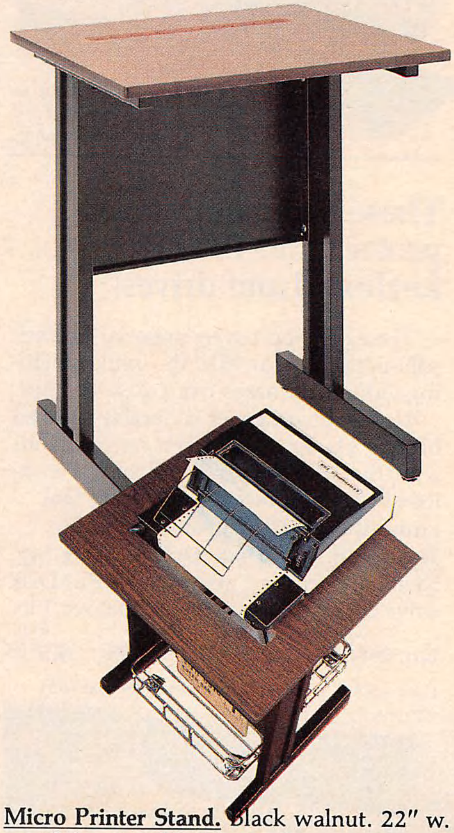
**It's an Inmac exclusive for personal computer users.**

And it's ideal for any rear or bottom feed printer that measures less than 22" wide by 20" deep. The 15" wide paper slot accepts 132 column printout.

**Practical styling fits into almost any office or home.**

With a walnut-grain top and complementary black trim, our compact printer stand is a welcome addition to any environment... and its rounded and T-molded corners won't mar walls.

Inmac's microprinter stand is built for today and tomorrow. No wonder it carries a full five year guarantee. Order it now, and you're assured of outstanding performance and appearance for years to come!



**Micro Printer Stand.** Black walnut. 22" w. x 20" d. x 26½" h. Wt. 30 lbs.

NEW FROM INMAC

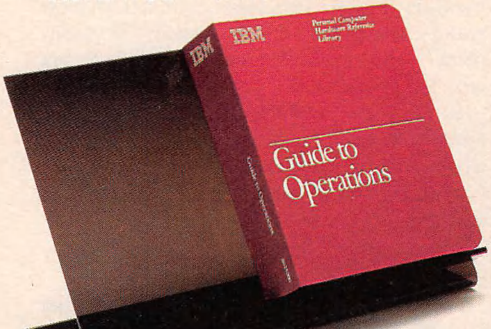
## Sturdy stand supports hefty manuals for easier, faster use.

Those bulky PC and software manuals are easy to use when propped at a comfortable viewing angle on this heavy-duty easel.

Made of thick bronze-tinted acrylic with an extra-wide lip, the exceptionally handsome stand will complement any computer.

**Manual Easel.** Dim: 10"h. x 15"w. x 5¼"d. Color: bronze tint. Wt. 2 lbs.

| Qty. | 1 | 2–5 | 6–10 |
|---|---|---|---|
| **No. 2977 P2** | **$21.95** | **$20.95** | **$19.95** |



*Pads on bottom protect desk and prevent sliding.*

## These handsome covers protect your IBM PC keyboard and drives!

These compact covers preserve the sleek silhouette of your IBM PC while shielding vulnerable areas from dust and dirt.

The keyboard cover is durable smoked bronze plastic. The drive cover blends with the IBM's styling and has a cushioned edge that forms a dirt-proof seal. Order this practical protection today.

**Keyboard and Disk Drive Cover Set.** Keyboard cover: 16½"w. x 4½"l. Disk drive cover: 12¼"w. x 3⅝"l. Total wt: 1 lb.

| Qty. | 1 | 2–5 | 6–10 |
|---|---|---|---|
| **No. 2976 P2** | **$23.95** | **$22.95** | **$21.95** |

*Good-looking, practical dust protection for your IBM.*

## Desk too narrow? Put your IBM keyboard in this roll-out drawer!

Now you can use your detached-keyboard computer on furniture as narrow as 16" with Inmac's ingenious Keyboard Keeper.

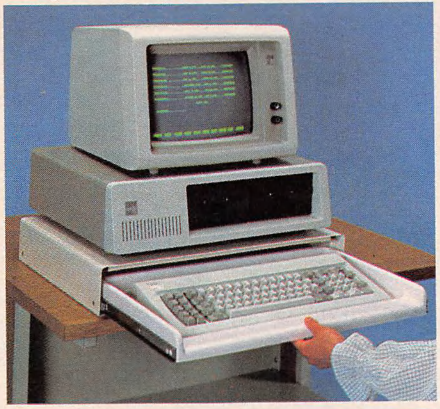
It stores your keyboard under your CPU or monitor . . . and rolls it out *in a drawer* when you want to use it.

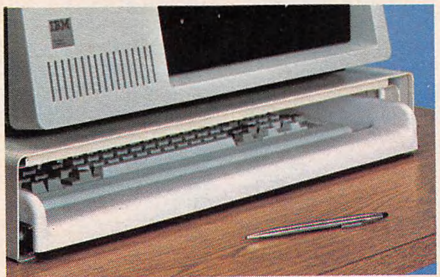
**Built right to last for years.**

The drawer rolls on industrial-strength ball bearing glides that perform flawlessly even under constant pressure from "heavy handed" keyboard pounders.

It automatically locks open for stability. It even has a built-in wrist rest!

*The keyboard drawer glides out and locks into place.*





*Your keyboard tucks neatly away until you need it.*

The shell of 20 gauge steel has a baked enamel finish that matches your IBM.

**Compatible with other PC's too!**

The keyboard keeper can be used with any computer whose detached keyboard fits within the dimensions listed below.

If you've been wishing for a way to "stretch" your too-narrow furniture, this is it! Order your keyboard keeper today!

**Keyboard Keeper.** Outside shell: 20 gauge steel. 21¾"w. x 3½"h. x 15½"d. Keyboard area: Molded plastic. 19¾"w. x 2¾"h. x 9½"d. Beige. Wt: 11 lbs., 6 oz.

| Qty. | 1 | 2–5 | 6–10 |
|---|---|---|---|
| **No. 2975 P2** | **$94.95** | **$89.95** | **$84.95** |

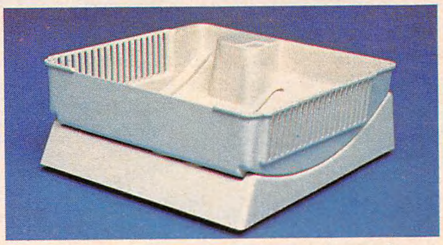
## Position your IBM monitor for comfort with our PC pedestal.

Don't let the fixed position of your IBM monitor cramp your style!

**Changes position when you do.**

Our PC pedestal swivels your monitor to face you (instead of vice-versa) . . . and varies its vertical angle as much as 40° for comfortable, glare-free viewing.

*Lets your monitor tilt and swivel so you don't have to.*



*Exclusively for use with IBM's color and monochrome monitors. Rubber feet prevent sliding and marring.*

The pedestal's ventilated basket cradles IBM's color or monochrome monitor securely.

At the touch of your hand, it tilts your monitor as much as 25° up or 15° down from horizontal and rotates up to 360°.

Place the pedestal directly on your desk, on your CPU, or wherever you like. No matter where you put it, you can angle the screen into your line of sight and out of the path of stress-causing glare.

**Give it a 45-day trial.**

Order yours today. It matches the color of your IBM exactly and will quickly become an integral part of your system.

If, after 45 days, you think you can bear to part with the added flexibility and comfort it gives, you can return it for a prompt refund.

**PC Monitor Pedestal.** Dim: 4"h. x 11"w. x 11"d. Color: Beige. Wt: 3 lbs.

| Qty. | 1 | 2–5 | 6–10 |
|---|---|---|---|
| **No. 2978 P2** | **$79.95** | **$75.95** | **$71.95** |

## NEW FROM INMAC

## Your IBM can't say "No!" to a thief, but our PC Protector can. Lock it up . . . and relax!

**An Inmac Exclusive!**

*Patent Pending*

Your IBM is an open invitation to thieves and 60 seconds is all they need.

Until now, all you could do was keep your fingers crossed. But today Inmac introduces the first real theft prevention for your IBM: The PC Protector.

### Easy to use . . . and built to last.

The IBM-colored 14-gauge steel cabinet bolts to your computer stand. Your CPU slides in from behind. The back panel attaches with hardware removable only with the special tool that's included.

Your keyboard sits snugly in a foam-lined flip-down door that lays flat or slants down for comfortable keying.

At the end of the day, flip up the door, lock it and leave . . . knowing your computer will be there when you return.

Order yours now . . . before it's too late.

**PC Protector.** Outside dim: 9⅞"h. x 21"w. x 17¾"d. Beige. 20 lbs. Fits XT models too.

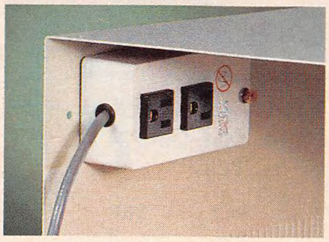
| Qty. | 1 | 2-5 | 6-10 |
|---|---|---|---|
| **No. 2986P2** | **$199** | **$195** | **$189** |

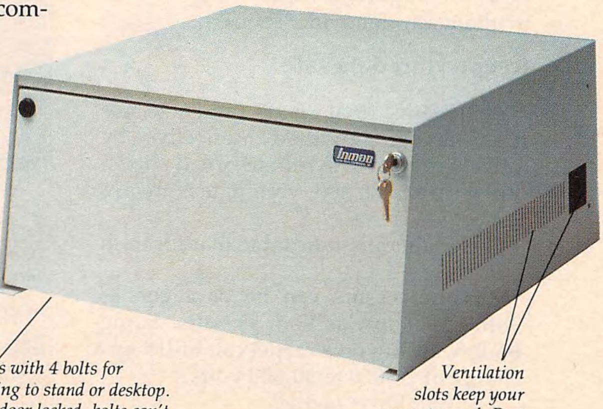
**PC Protector with Surge Suppressor.**

| Qty. | 1 | 2-5 | 6-10 |
|---|---|---|---|
| **No. 2988P2** | **$249** | **$245** | **$239** |

*Guards against theft, tampering and unauthorized use. Hardware & instructions included.*

*Optional built-in surge suppressor intercepts voltage spikes which can damage hardware or cause data loss.*





*Locks for quick, easy protection against an expensive loss.*

*Comes with 4 bolts for securing to stand or desktop. With door locked, bolts can't be reached by would-be thieves.*

*Ventilation slots keep your computer cool. Port allows access to your IBM's on-off switch.*

## IBM keyboard template shows software commands at a glance!

This instant documentation chart is such a time and trouble saver, you'll wonder how you got along without it!

### A great learning tool . . . and more!

Documate fits the keyboard of your IBM PC. It lists all the information you need to quickly make full use of your Basic, VisiCalc or WordStar programs.

One side shows frequently used prompts, commands, symbols, printer setups, formats and functions. The flip side lists those used less often.

The information is logically categorized and printed in easy-to-read bold type that won't smear or rub off.

No more time wasted fumbling through manuals . . . with a Documate, you can find the information you need with your fingers still on the keyboard!

PC-DocuMate
WORDSTAR

*Handy Documate saves time and improves your efficiency by listing WordStar, VisiCalc or Basic commands right on your IBM keyboard!*

### Durable, practical & attractive.

The non-reflective polystyrene template is color-matched to your IBM, so it looks like part of the machine. It wipes clean and won't crease or dog-ear.

Order a Documate for each popular program you own and start using *all* the powerful features your software offers.

**Basic Documate.** 18"w. x 7"h. Beige. 3 oz.

| Qty. | 1 | 2-5 | 6-10 |
|---|---|---|---|
| **No. 5963P2** | **$14.95** | **$13.95** | **$12.95** |

**VisiCalc Documate.** 18"w. x 7"h. Beige. 3 oz.

| Qty. | 1 | 2-5 | 6-10 |
|---|---|---|---|
| **No. 5961P2** | **$14.95** | **$13.95** | **$12.95** |

**WordStar Documate.** 18"w. x 7"h. Beige. 3 oz.

| Qty. | 1 | 2-5 | 6-10 |
|---|---|---|---|
| **No. 5962P2** | **$14.95** | **$13.95** | **$12.95** |

## Desktop printer stand ends paper-feed problems.

Here's an inexpensive way to solve your printer's paper-feed problems. Just set your rear- or bottom-feed printer on top and tuck the paper supply underneath. You'll get smooth, continuous printing . . . and a neat, well-organized worksurface.

Ideal for use with Epson, Centronics and many others.

**Standard Desktop Printer Holder.** Putty. 14¼"w. x 13"d. x 4¼h. Wt. 8 lbs.

| Qty. | 1-2 | 3-5 | 6-9 |
|---|---|---|---|
| **No. 4868P2** | **$29.95** | **$28** | **$26.50** |

**Large Desktop Printer Holder.** Putty. 21"w. x 13"d. x 5"h. Wt. 11 lbs.

| Qty. | 1-2 | 3-5 | 6-9 |
|---|---|---|---|
| **No. 4869P2** | **$39.95** | **$37** | **$35** |

*Paper supply tucks neatly underneath.*

## NEW FROM INMAC

## Eliminate static problems with our grounded table mat.

One zap of static electricity can cause your computer to garble data and lose programs. It can even damage your components.

Now you can protect your data by using our new Zap Guard table mat.

Simply touch the mat before switching on your computer and the static in your body is instantly dissipated (without any annoying "shock").

**Keeps your data safe.**

Anti-static floor mats and rugs can be rendered ineffective by today's rubber or synthetic-soled shoes. But, with a table mat, your data is always protected.

Order an anti-static table mat for each of your PCs and be sure your data is safe.

> **"Microprocessors can be damaged by voltages as low as 10 or 15 volts. Somebody walking on a carpet can build up a charge of 20,000 to 30,000 volts."**
> *—The Wall Street Journal.*

*10' grounding cord safely drains static from the mat.*

*Anti-static table mat protects any PC or terminal!*

**Zap Guard Table Mat.** Dim. 24"w. x 26"l. x 1⅛"d. Wt. 5 lbs. Beige.

| Qty. | 1–2 | 3–5 | 6–10 |
|---|---|---|---|
| No. 6628P2 | $69 | $64 | $59 |

## Carry up to fifty 5¼" floppies in our new Porta-File!

Porta-File's built-in handle lets you safely carry up to fifty 5¼" floppies.

Made of rugged Lexan,® it's guaranteed for life. Interlocking ribs on the bottom allow you to stack several on top of each other. Cover detaches to save space. **Porta-File.** 5"h. x 8½"w. x 8½"d. Wall mount clip & screws incl. 2½ lbs. Smoke.

| Price each | 1 | 2–5 | 6–10 |
|---|---|---|---|
| No. 2513P2 | $29.95 | $24.95 | $19.95 |

*Rugged case protects your floppies wherever you go!*

## New sound cover gives you instant relief from the buzz and clatter of small dot-matrix printers.

It's a fact. Noise from 80-column, dot-matrix printers, like Epsons and Okidatas, is annoying, fatiguing and can cause your efficiency to take a nose-drive.

Our sound cover reduces noise by as much as 29 decibels. So you can hold a conversation without shouting, concentrate on the job at hand and instantly improve your productivity as errors and aggravation disappear.

**Our cover uses less desk space.**

Most sound covers are large, heavy, expensive contraptions, but ours measures a compact 7¼"H x 18½"W x 17¾"D, weighs only 12 lbs. 13 oz. and costs about 2/3 less.

This means more valuable working room on your desk and more money in your pocket.

**How the 45° tilt works:**

Included is a stand which tilts the cover to a 45° angle. This keeps everything conveniently on your desk-top by allowing paper to feed from underneath the sound cover while your printout fan-folds behind it.

**Hearing is believing . . .**

Try our new sound cover risk-free for 45 days. If you're not completely satisfied, simply return it for a full refund.

*This cover doubles as a data holder while saving space.*

*Paper flows easily in both upright or flat positions.*

*System Courtesy of Computerland/Santa Clara.*

**80-Column Printer Sound Cover.** Beige. 7¼"H x 18½"W x 17¾"D. Wt. 12 lbs. 13 oz.

| Price each | Qty. 1 | 2–5 | 6–10 |
|---|---|---|---|
| No. 6649P2 | $139 | $129 | $119 |

**For these (and other) 80-col. dot-matrix printers:**

Apple Dot-Matrix
Atari 825, 1025
C. Itoh Prowriter
Centronics 737, 739
Epson FX, MX-70, MX-80FT
IDS 480
IBM Epson
Mannesmann Tally 160
NEC PC-8023A-C
Okidata 80, 82A, 92

### NEW FROM INMAC

## Cleaning floppy drive heads can prevent read/write errors, avoid oxide build-up.

Don't wait until a dirty drive head causes you frustrating and time-consuming read/write errors. Start cleaning your drives this week!

When you use our Clean Cycle Kit, it's easy, it's fast (only 30 seconds) and it costs less than a dollar per use! That saves money over kits from other sources that give you fewer total cleanings.

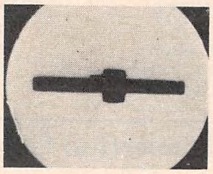
**Why do you need to clean your drives?**
All drive heads pick up oxide particles from disk surfaces. As this contamination accumulates, it lifts the head away from the disk... and read/write errors result.

Unlike other peripheral devices, the read/write heads of floppy disk drives are difficult to access without partially disassembling the unit. But you don't even need a screwdriver to clean your heads safely with our Clean Cycle Kit.

Just saturate the cleaning diskette with solution and engage it in your drive. As it rotates, it sweeps the head to loosen and then remove all contaminants.

inmac
Clean Cycle Kit
For 5¼" Flexible Disk Drive Heads
Cleaning Solvent
Cleaning Solvent

*Over time, drive heads can become badly contaminated like the one shown above.*



*This same head after a simple 30-second treatment with our Clean Cycle Kit.*

**The solution is safe and the procedure is effective.**
You can use the Inmac Clean Cycle Kit with single- and dual-sided drives that accept disks with standard ANSI-type jackets.* It's been approved by major drive manufacturers and is compatible with their disk drive warranties.

Order an economy size or starter kit today and begin a regular cleaning program now!

**Economy Size Clean Cycle Kit for 8" flexible disk drives.** 60 cleanings. Contains 3 cleaning disks, 2 bottles of solution. Wt.: 1½ lbs.

| Qty | 1 | 2-4 | 5-9 |
|---|---|---|---|
| No. 7160P2 | $49 | $47 | $45 |

**Economy Size Clean Cycle Kit for 5¼" disk drives.** 60 cleanings. Contains 3 cleaning disks, 1 bottle of solution. Wt.: 1 lb.

| Qty | 1 | 2-4 | 5-9 |
|---|---|---|---|
| No. 7159P2 | $45 | $43 | $41 |

**Starter Kit for 8" drives.** **NEW**
Contains 1 cleaning disk, solution for 20 cleanings. Wt.: 1 lb.

| Qty | 1 | 2-4 | 5-9 |
|---|---|---|---|
| No. 7158P2 | $19 | $18 | $17 |

|---|---|---|---|
| No. 7157P2 | $17 | $16 | $15 |

**The following drivers require floppies with non-standard jackets and are, therefore, not compatible with the Clean Cycle Kit: Burroughs B-80 and MB Super Mini Drives, or Vydec 1200, 1400 and 4400 (Memorex 651).*

## Our master kit shows you how to clean all your system's vital components

Inmac's master kit is a complete, low-cost package with the cleaning fluids and tools you need to keep your system—including floppy drives, printer and monitor—as clean as the day you installed it.

Here's what the master kit includes:

- Helpful instruction book.
- Head cleaning disk to prevent oxide buildup. (Good for 20 weekly cleanings!)
- Floppy drive cleaning solution.
- 50 lint-free cleaning wipes.
- 10 dual-ended cleaning wands.
- CRT screen cleaning fluid. Anti-static ingredient prevents harmful dust buildup.
- CRT screen wipes for lint-free cleaning.
- Type-font brush to remove ink.
- Anti-static spray to protect equipment and data from electrical charges.

If you value your equipment, order this complete, easy-to-use kit today!

# New! Improved Inmac Standard Flexible Disks match the high quality of leading brands—at lower prices!

Now, economically priced Inmac Standard Disks give you top brand-name performance!

**Greater tolerance. New hub rings.**

Each Inmac Standard disk meets a higher certification level than ever to assure you of faultless performance on even the least cooperative drives.

Plus, our 5¼ floppies* come with reinforcing hub rings to protect the center hole from warps or tears that can cause slippage or misalignment errors.

**Ideal for "utility" applications.**

Any program or file you spend time creating is worth backing up. And Inmac's Standard Brand Diskettes are a natural, because they're dependable yet economical. They're also ideal for higher volume applications such as word processing, where guaranteed reliability is so important.

**A guarantee five times the industry standard!**

Inmac Standard Diskettes are so reliable we now guarantee them 100 percent accurate for five full years. That's five times the warranty on many higher-priced disks.

**How to order.**

If you're not sure what type diskette you need, check the charts on this page. Then give us a call.

We'll make sure you're getting the right disk, and fill your order within 24 hours. If you're facing an emergency, let us know and we'll fill your order even faster.

*Hub rings not included with product #7895.

# Floppy breakthrough! Introducing a 100% reliable disk from Inmac for as little as $1.59: Encore™!

At last, a diskette good enough to earn the Inmac name ... at a price so low, it could re-define the way you use floppies!

### Don't be fooled by "Brand X" disks; get the Inmac stamp of quality!

These are *not* those discounted "no-name" diskettes—uncertified "seconds" or cosmetic rejects that are cheap to buy but become very costly when they "deep six" your data or grind your drive head.

Encore™ disks not only meet all industry (ANSI) standards, they stand up to our own even *tougher* tests of quality.

ENCORE
Ten 8" Diskettes From INMAC
ENCORE

ENCORE
inmac

*Inmac Encore™ Flexible Disks give you good old-fashioned value: A low-cost floppy you can depend on.*

### Backed by a 1-year guarantee.

Each disk you buy is manufactured under strict QA procedures, then electronically tested and certified 100% error-free.

We guarantee it to perform that way for a full year... or we'll replace it free!

### So many applications!

If you've risked not backing up your disks because it was just too expensive, now you can afford that security.

Encore™ is so inexpensive, you can dedicate a disk to each file, making the job of organizing data faster and easier!

They're ideal for memos, rough drafts, agendas...and saving those seeds of ideas that now slip away because you can't spare expensive disk space. You'll find dozens of ways to use them!

They're compatible with most popular systems, including Apple II, II Plus, IIe, III; IBM PC; TRS-80; Wangwriter and more.

### To order, just give us a call!

If you're not sure which disk you use, see the chart below or call us. Encore is also available in two 8" configurations (8" SSSD Soft Sector IBM 2305830 and 8" SSDD Soft Sector). We'll ship your order within 24 hours and give you 45 days to try them out!

## Inmac Encore Specifications

- 100% read/write accuracy at 40% clipping level.
- Performance that meets ANSI industry standards.
- Meets or exceeds system requirements.
- Shrink wrapped to prevent contamination.
- Manufactured under strict QA procedures.
- Full one-year guarantee. If a disk should fail to perform after 3 read/write attempts, return it postage prepaid for a prompt exchange, refund or credit. Understandably, we cannot warranty damage resulting from improper handling, neglect or abuse.

# Protect the time you spend programming and entering data. Inmac Plus™ Diskettes are guaranteed to read/write with 100% accuracy for a lifetime!

A lifetime of flawless performance is yours with Inmac Plus Diskettes. You're guaranteed 100% read/write accuracy for as long as you own them. You'll never have to buy another replacement disk—ever!

But does it pay for a personal computer user to require the finest disks on the market?

Yes . . . when you realize that the least expensive disk is the one that works—always.

Maybe you've spent a day or more writing your own program, and then another couple of days debugging it. But what happens when you turn your computer on and insert the disk in your drive?

"READ ERROR" appears on the screen. And then you have to start over. It's cost you hours of programming, plus irretreivable data, and there's nothing you can do, except begin again.

**That's the real price you pay for so-called "Bargain" disks.**

The performance of Inmac Plus Disks exceeds ALL applicable industry standards. In fact, if an Inmac Plus diskette *ever* fails to read or write (even if your drive gets finicky once in a while) we'll replace it—immediately and without charge.

What makes Inmac Plus Disks so good?

**1. Higher signal output assures trouble-free operation with all types of drives.**

Inmac Plus Disks are guaranteed to deliver 100% read/write accuracy at a 50% higher signal than industry specifications. This assures consistent performance on all types of drives.

**2. Flake-proof oxide coating gives your data lifetime protection.**

Other disks have hard oxide coatings that gradually break down, causing data loss and time-consuming errors. An Inmac Plus Disk is different. Its coating is flexible, so it "gives" instead of flaking.

**3. Permanently lubricated surfaces resist wear to help protect your drives.**

Some disks are only "overcoated" with a surface layer of lubricant that quickly wears off. *Other disks have no lubrication.*

Each Inmac Plus Disk has a specially cured lubricant that's permanently baked into the oxide coating.

**4. Flawless performance is guaranteed under changing environmental conditions.**

A personal computer user doesn't have the luxury of a "computer room" environment. But you can have disks that will compensate for environmental fluctuations in your drive that you can't control or even anticipate.

INMAC PLUS
10 LIFETIME FLEXIBLE DISKS
inmac
PLUS

Inmac Plus Disks are made from a special mylar that retains its shape. "Bargain" disks often are made of lower quality materials that distort when the temperature or humidity in the drive changes rapidly . . . and if the data tracks on your disks don't line up *precisely* with the read/write heads in your drive, you've lost whatever is on that disk.

**5. Blue reinforcing ring protects against "center-hole" wear.**

All 48 TPI Inmac Plus Disks are fitted with a special ring around the center hole. There's no better protection for your disks against warps, dents, burrs or tears. The ring also eliminates errors caused by disk slippage or drive misalignment.

## The Inmac Plus™ Lifetime Guarantee

***Each Inmac Plus flexible disk is guaranteed to read and write 100% error free and to perform to your complete satisfaction...for as long as you own it.***

***Should an Inmac Plus disk ever fail, for any reason whatsoever, return it postage prepaid to your nearest Inmac branch for prompt refund or replacement.***

***Understandably, we cannot guarantee damage resulting from neglect or abuse. Nor can we assume responsibility for any consequential damages.***

**Order a box of Inmac Plus Disks. Use them for 45 days, risk-free.**

The chart on this page shows which Inmac Plus Diskettes fit your system; call if your system isn't listed. Our customer service representatives can tell you which diskettes you need.

Use these diskettes with total confidence. Write a new program. Store the data. See how much more confident you feel with disks that are so unfailingly accurate and reliable.

And if you *ever* get a read/write error with your Inmac Plus Diskettes, let us know. We'll replace the diskette, promptly—and at no charge.

## Inmac Plus Specifications

- Guaranteed 100% read/write accuracy at 60% clipping level.
- Performance exceeds all applicable industry standards: ANSI (U.S.A.), ECMA (Europe), ISO (Japan).
- Coating thickness:
  48 TPI disks: 2.5 µm ± 0.2µm.
  96 TPI disks: 1.4 µm ± 0.1µm.
- Biaxially oriented polyester substrate and special annealing process assure dimensional stability. Disks are punched from non-tensioned web for maximum dimensional accuracy.
- Quality control procedures: 32 separate quality tests throughout the manufacturing process... for each diskette. Final visual inspection. Each individual disk tested in a drop-through gauge for jacket flatness.
- Registration: each disk individually serialized and tracked throughout the manufacturing process.
- Protective envelopes: tear-resistant Tyvec®.
- Liner material: non-woven cloth chosen after tests on 400 different materials. Offers minimal fiber-extrusion with excellent cleaning effect.
- Guaranteed to read/write with 100% accuracy for as long as you own the diskettes.

# Here's one floppy filing system you'll never outgrow!

Our Floppy Manager™ storage modules are so versatile, they can be put together in any configuration to perfectly suit your personal work area.

**Interlock on top, bottom, sides.**

The cases can be interlocked in rows or stacks of any size or shape. Use them on a bookshelf, your desk or even in your file drawers.

Pressure-sensitive labels tell you at a glance which disks are stored inside.

**Access tray: the key.**

An access tray automatically flips forward when the case is opened, so your floppies are available quickly.

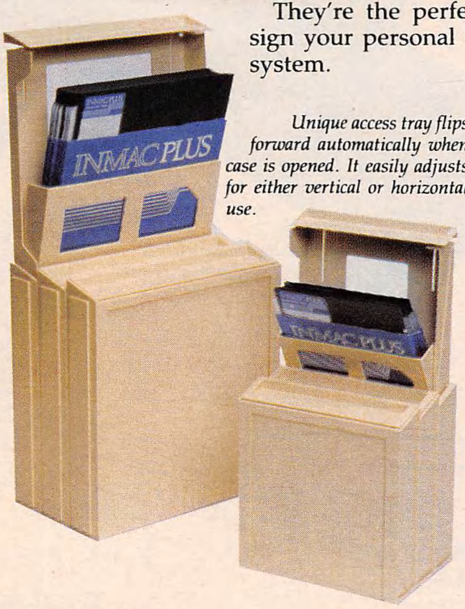
No matter how large a library you build, each individual disk is always easily accessible in seconds.

**Take them along when you travel.**

Each module holds up to 10 floppies in a protected dust-free environment.

When you travel, individual cases make perfect diskette carriers. They're easily removed without disturbing the rest of the system. Cases can also be removed for fireproof storage, or can be easily rearranged to meet new space requirements.

They're the perfect way to design your personal floppy storage system.



*Unique access tray flips forward automatically when case is opened. It easily adjusts for either vertical or horizontal use.*

Order your Floppy Manager file cases today and you can put them to work tomorrow.

**8″ Floppy Manager storage system.** Holds 10 flexible disks. Dim: 9½″ h. x 9″ w. x 1¾″ d. Wt: 1 lb. Polystyrene. Beige.

Convenient Order Form on Page 48

# With the Fortifier™ and five minutes time, you can virtually triple the life of your floppies.

Here's a great way to increase the mileage you can get from each flexible disk and minifloppy. It's called the Fortifier.

And, at just 20¢ per application, it not only protects your disks—it can virtually triple their life!

**It protects your disks from hazards.**

As a precision instrument, your drive is sensitive to several factors which can cause it to damage your valuable disks.

That's why your disks need the kind of protection the Fortifier gives. It:

- Prevents your drive's clamping hub from tearing the disk's inner hole.
- Prevents coating removal, dimpling.
- Prevents data loss resulting from the improper rotation of your disks.

**Your best buy in floppy protection.**

Since Inmac first introduced the Fortifier in 1979, many imitations have popped up. Frankly, ours costs a little more, but it's well worth it. Here's why:

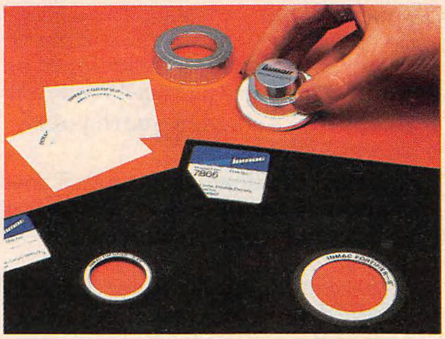
1. The Fortifier is a patented, dual-duty tool. You can use it for both 8″ and 5¼″ floppies. One tool does two jobs.
2. The Fortifier is made of precision-cast metal (aluminum). It won't break or distort with use, as with plastic.
3. The Fortifier includes a convenient hand press. A must for accurate, easy hub ring application.

**The Fortifier Flexible Disk Reinforcing Kit.** For 8″ and 5¼″ disks. Includes 20 vinyl rings, Wt. ¼ lb.

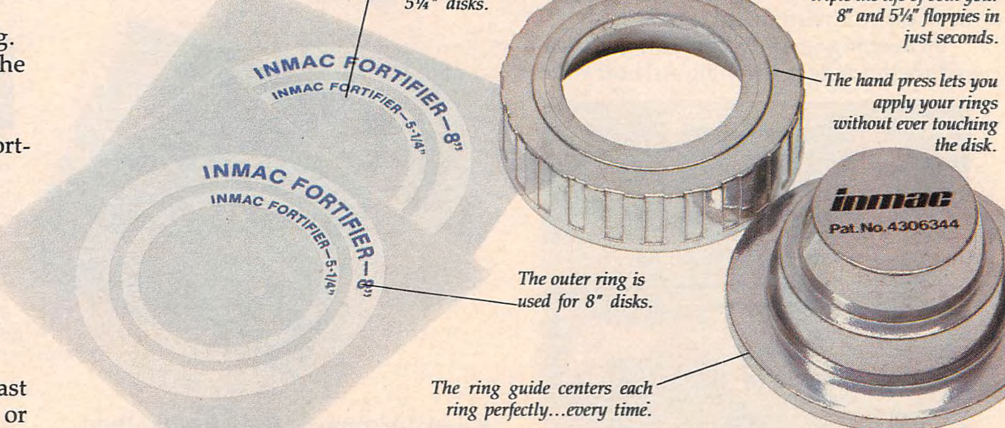
| Qty. | 1 | 2-5 | 6-10 |
|---|---|---|---|
| **No. 7955-2P2** | **$14.95** | **$13.95** | **$12.95** |

**Extra Reinforcing Rings.** New economy pack of 50 rings for 8″ and 5¼″ disks.

| Qty. | 1 | 2-5 | 6-10 |
|---|---|---|---|
| **No. 7951P2** | **$ 9.95** | **$ 8.95** | **$ 7.95** |



*With the Fortifier, you can triple the life of both your 8″ and 5¼″ floppies in just seconds.*



*Use the inner vinyl ring for 5¼″ disks.*

*The hand press lets you apply your rings without ever touching the disk.*

*The outer ring is used for 8″ disks.*

*The ring guide centers each ring perfectly...every time.*

## Compare the features before you buy.

Our Fortifier costs a little more than some on the market. Check our features and you'll agree Inmac's Fortifier is the real bargain.

| | Hand Press Included | Accommodates both 5¼″ and 8″ Diskettes | Precision Aluminum | Handy Storage Box |
|---|---|---|---|---|
| Inmac's Fortifier | YES | YES | YES | YES |
| Visible | YES | NO | NO | NO |

# Locking file prevents floppy disappearance.

If you've ever wanted to place your valuable floppies under lock and key, now you can.

Our Locking Diskette File keeps 8″ or 5¼″ disks at your fingertips, and locks tight to keep them there. The file is available in 40 or 90 disk capacity.

A handsome anti-static cover guards your floppies against contamination and prevents accidental spills while in transit.

The smoke-colored cover detaches and fits snugly around the bottom for easy desktop or CRT stand use.

Convenient dividers stay in place to protect your disks and keep them organized. Self-adhesive labels are included.

Start keeping a tighter rein on your valuable data. Order today, we'll ship your Locking Diskette File tomorrow.

**90 cap. Locking 8″ Diskette File.** 13¾″ L. x 9½″ W. x 9″ H. 4 lb. 10 oz. Smoke/Putty.

| **No. 2524P2** | **$49** | **$44** | **$41** |

**40 Cap. Locking 5¼″ Diskette File.** 8¼″ L. x 7⅛″ W. x 6½″ H. Wt. 1 lb. 9 oz. Smoke/Putty.

| Qty. | 1 | 2–5 | 6–10 |
|---|---|---|---|
| **No. 2525P2** | **$37** | **$33** | **$30** |

*Each Locking File comes with 2 keys for your convenience.*

# Our new envelopes and binders are the low-cost answer to your floppy storage needs!

If you need a way to safely file your floppies—yet keep them accessible—without spending a lot of money, look at our new expanded selection of envelopes and binders. You'll find just what you're after.

**Keeps disks clean to guard your valuable data.**

Each of our floppy envelopes is made of a strong, flexible vinyl that's specially textured and reinforced to make it extra durable.

These non-porous envelopes protect the data on your disks from being destroyed by scratches, dust, dirt, spills and other contaminants frequently found in an office environment.

By keeping your disks clean, you also reduce the danger of getting dirt near your disk drive head—a potential cause of costly read/write errors.

*Our new envelopes and binders give your floppies the care they deserve . . . at a price you can afford!*

**Bigger pockets allow safer disk storage.**

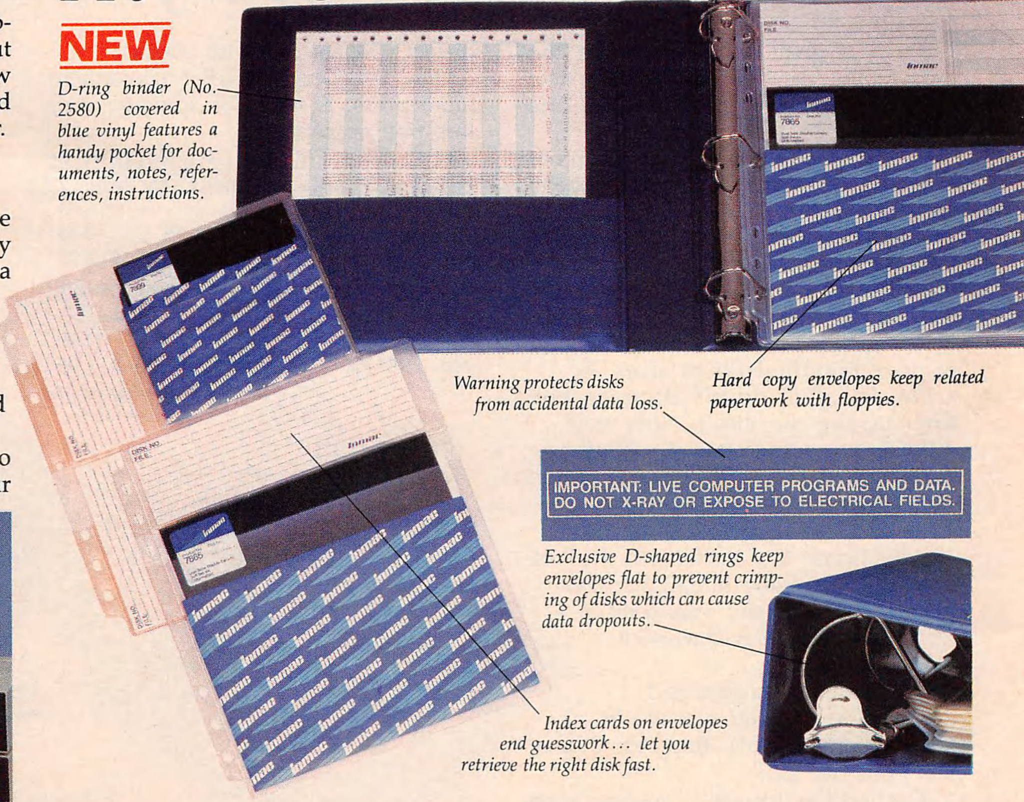
The roomy design of these envelopes gives your disks extra protection against contamination and creasing by allowing you to store them in their own jackets—a feature available only from Inmac!

**High volume storage envelopes.**

For large quantity disk storage at the lowest cost, choose our regular vinyl envelopes. Each holds two 8″ or four 5¼″ floppies in individual back-to-back pockets for easy access.

Index cards allow fast, accurate identification of the contents of each disk.

**Prices Reduced 25%**



IMPORTANT: LIVE COMPUTER PROGRAMS AND DATA.
DO NOT X-RAY OR EXPOSE TO ELECTRICAL FIELDS.

**NEW**

*D-ring binder (No. 2580) covered in blue vinyl features a handy pocket for documents, notes, references, instructions.*

*Warning protects disks from accidental data loss.*

*Hard copy envelopes keep related paperwork with floppies.*

*Exclusive D-shaped rings keep envelopes flat to prevent crimping of disks which can cause data dropouts.*

*Index cards on envelopes end guesswork . . . let you retrieve the right disk fast.*

**Keep documents & disks together.**

For convenient storage of related documents with each disk, choose our new envelopes with hard copy pockets. They save time by letting you keep everything you need in one place.

Each stores one 8″ or 5¼″ disk and features a separate pocket which holds up to 10 pages of 8½″ x 11″ source documents, printout, procedures, etc.

**D-ring binder prevents bends.**

To organize your envelopes, we offer our high quality binder designed especially for floppy storage.

The slanted D-shape rings keep your envelopes flat, preventing crimping and binding that can damage disks.

**Notice guards against mishandling.**

A warning printed on the attractive blue vinyl cover reminds disk users to avoid subjecting contents to magnetic fields which could cause data dropouts.

The binder holds up to 20 envelopes of either design. If you use the regular vinyl envelopes, you can store up to forty 8″ disks and eighty 5¼″ floppies in a single low-cost, space-saving binder!

**Order now for shipment tomorrow.**

Start counting your floppies and figure out how many binders and envelopes you need. Then give us a call and we'll ship your order within 24 hours.

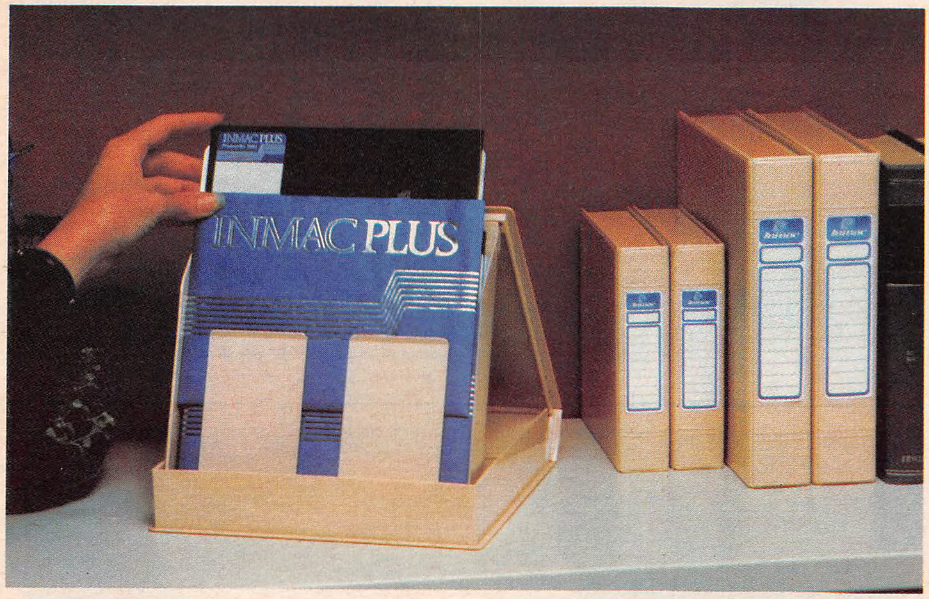
# An economical way to store and protect flexible disks that's as easy as putting books on your shelf.

The price of our library cases is almost too small in comparison to the valuable data you'll store in them. It's not often you can buy a product at such a low cost that gives you such high efficiency.

We've been in many installations where flexible disks were vulnerable to contaminants. Like dirt. Dust. Hot coffee. Ashes. Paper clips. The list goes on and on. But every disk needs proper care. And all it takes to properly protect them is our floppy library case.

*Give your flexible disks the protection they need. Store them in our economical library cases.*



Now, instead of storing your disks in an ordinary cardboard box, you can buy a case *custom* made for the job.

**The archival storage you need.**

Keep these cases on your bookshelf or desk to help *eliminate* harmful condensation and moisture absorption.

Each case protects up to 10 disks from cupping and curling.

**They offer convenient flexibility.**

The high-impact polypropylene insets and fan tabs give you the access you want. A *pop-up* feature puts all your disks in full view. And ID labels on the spine tell you what's where at a glance.

So order yours today. It's a small price to pay for good looks, portability and disk protection.

**8" Flexible Disk Library Case.** Polypropylene. For 10 flexible disks. 9½" h. x 9" w. x 1¾" d. Wt. 17 ozs. Beige.

| Qty. | 1-10 | 11-50 | 51-100 |
|---|---|---|---|
| **No. 2459P2** | **$3.95** | **$3.50** | **$2.95** |

**5¼" Minifloppy Disk Library Case.** Polypropylene. For 10 minifloppies. 6¼" h. x 6½" w. x 1 9/16" d. Wt. 9 ozs. Beige.

| Qty. | 1-10 | 11-50 | 51-100 |
|---|---|---|---|
| **No. 2460P2** | **$2.95** | **$2.50** | **$2.25** |

# Keep up to 50 floppies safe and close-at-hand.

Our customers tell us this Floppy Desk File is the most convenient system they've found for storing their most frequently used floppies.

Why? Because they can access up to 50 floppies quickly and easily while keeping them safely tucked away in a desk area smaller than a sheet of letterhead.

**Sits on your desk; easy-to-use.**

The sturdy, see-through cover lifts open at the touch of a finger (but stays securely shut when the unit is carried).

Five adjustable index dividers make your disks easy to find. They're movable so each section can be made smaller or larger as your needs change. And, since they lock in place, your disks always stay upright—no matter how few or how many are in the file.

A sliding tab on each divider can be set for best visibility. Because they're plastic—not cardboard—dividers won't get dog-eared or torn.

**Protects from dust, dirt and spills.**

The unit's heavy-gauge molded acrylic base shields your floppies from the coffee, crumbs and staples that plague most work areas, while the hinged cover keeps them free from dust and moisture.

This keeps your disks right where you need them, yet protects against data loss and drive damage.

**Built for safety, efficiency and good looks.**

The sleek, smoke-tinted, high-tech design of the case compliments any decor.

Non-skid feet on the base keep it in place. They prevent sliding or falling caused by keying vibrations.

**We use 'em ourselves.**

If you use your disks daily, like we do, we know you'll appreciate the time-saving simplicity this floppy desk file offers.

Order several now and see why thousands of users say these are the best floppy files they've found.

**8" Floppy Desk File.** Holds 50 8" floppies. Dim. 9⅝" w. x 10" d. x 9" h. Wt. 4½ lbs. Smoke color.

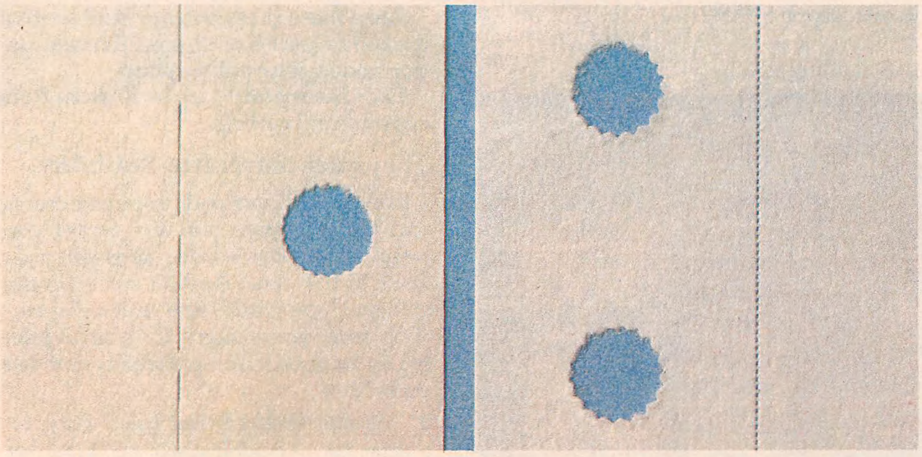
# New! Satin Edge™ paper gives you the look of fine stationery, the convenience of continuous form paper.

Now all your computer-generated correspondence can have a high quality, professional look when you use Satin Edge™ paper from Inmac.

Satin Edge is unlike any computer fanfold paper you've ever seen. Detach the carrier strips and you have a clean, neat edge—a sheet of paper with the look and feel of fine stationery. Satin Edge makes all your correspondence—even form letters—look more personal and more professional, so your letters and reports will be better received. And you'll never have to deal with the impersonal, ragged look of ordinary computer fanfold paper!



Satin Edge is compatible with any pin-feed printer, so you don't need a special sheet feeder. Try a carton today, and see the difference Satin Edge can make for you.

**Satin Edge Continuous Form Stationery**

| Order # | Description | Sheets per Carton | Case Weight | Price/Carton 1-2 | 3-5 | 6-11 |

## Inmac post-type binders give you a choice of 3 styles, 6 colors, 5 sizes.

Our expanded line of post-type binders can help you organize and store all your printouts.

All load from either the top or the bottom, for quick page changes, and feature slide-out suspension hooks for easy filing, steel posts to support up to six inches of paper and wipe-clean covers.

**Choose from three types of covers.**
For the greatest savings, choose our 20-point pressboard covers.

Covers made from 20-point plastic-coated Presstex resist moisture and last up to ten times longer than ordinary uncoated board.

To get maximum protection and durability, you'll want 23-point vinyl covers. They're virtually indestructible.

**Order from this chart.**
Unburst binders bind along the top and can be used with burst or unburst forms. Each box contains 10 binders of the same color.

*These attractive post-type binders are available in a variety of colors and sizes.* ***Inset:*** *Built-in suspension hooks are standard on all of our binders.*

# Add impact to your letters, memos...even invoices!

If you have an IBM Selectric I or II, Remington SR-101, Silver Reed, Xerox 88 or any machine that uses the 88-character "ball" element, our 13 distinctive typestyles can add a subtle, yet powerful "voice" to everything you type.

They can help you:

- Command authority (Letter Gothic)
- Put a sales prospect at ease (Script)
- Formalize documents (Olde English)
- Ensure readership (Orator)

**IBM quality...for less!**

Each element is made of the same durable, high-impact plastic IBM uses.

Quality and performance are identical, too...but we sell them for less! And if you use our quantity discounts, you can save even more.

**Start using the most valuable feature of your typewriter now.**

Order the styles that will give your documents just the right impact. They're in stock, ready for immediate shipment.

*Use these typestyles to reinforce your written messages.*

## Pricing Guide

| Price each | Qty. 1 | 2–5 | 6–11 |
|---|---|---|---|
| **All elements (except Olde English)** | **$17.95** | **$17.40** | **$16.95** |
| **Olde English** | **$29.95** | **$28.95** | **$27.85** |

Note: Yes! All print elements (except Olde English #6774) can be mixed and matched to achieve the highest quantity discounts.

## Typing Element Selection & Pricing Guide

| Typestyle | Pitch | IBM Part # | Inmac Order # |
|---|---|---|---|
| ORATOR ANNOUNCES YOU LEGIBLY | 10 | 141 | 6775P2 |
| LETTER GOTHIC makes invoices move | 12 | 138 | 6776P2 |
| PRESTIGE ELITE 72 gives you clout | 12 | 143 | 6777P2 |
| *SCRIPT for a warm, personal touch* | 12 | 145 | 6778P2 |
| COURIER 72 reproduces nicely | 10 | 134 | 6779P2 |
| COURIER 12 gives class to letters | 12 | 132 | 6780P2 |
| PRESTIGE PICA 72 hypes stats | 10 | 123 | 6781P2 |

| BOOKFACE ACADEMIC 72's swell | 10 | 158 | 6783P2 |
| ARTISAN 12-72 looks clean & crisp | 12 | 131 | 6784P2 |
| *COURIER 12 ITALIC to emphasize it* | 12 | 133 | 6785P2 |
| PRESENTOR demands attention! | 10 | 245 | 6786P2 |
| OLDE ENGLISH for formalizing | 10/12* | -- | 6774P2 |

*Olde English (#6774) will fit on both 10 and 12 pitch Selectric I and II's.

These elements are the American Standard version with 88 characters. Each has "!" over the "1" on the top left key and "¼" over "½" on the key to the right of "P"

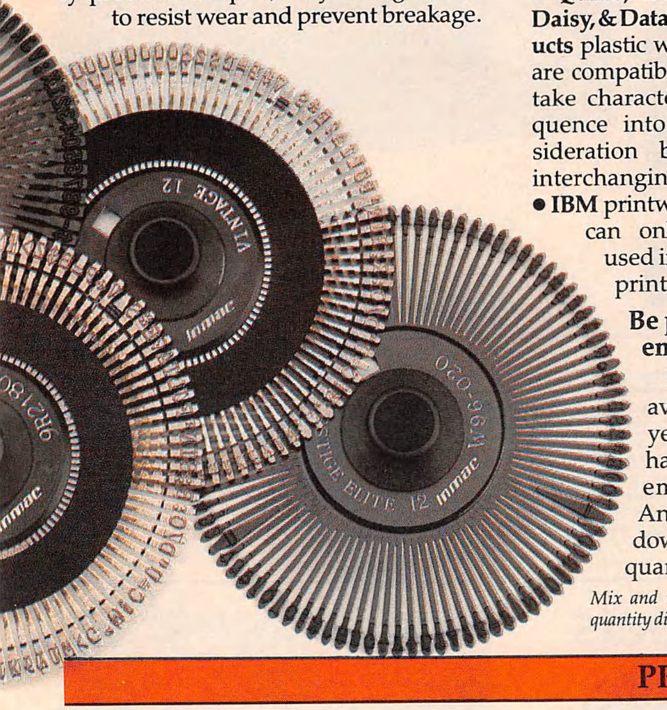
**Check our new lower prices**

# Get the highest quality printwheels, in one of the widest range of typefaces, shipped within 24 hours.

Whether you order 5 printwheels or 50, we'll get them to you faster than anyone else in the industry.

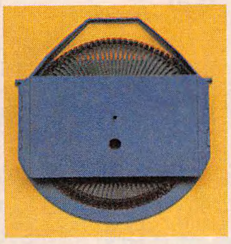
And best of all, the printwheels you receive will be of the highest quality.

The characters on each wheel are not only precision shaped, they're engineered to resist wear and prevent breakage.



## What you should know about interchanging printwheels.

- **Plastic and metal** printwheels are usually not interchangeable due to differences in weight, balance and printer hammer intensity.
- **Qume, Diablo, Daisy, & Dataproducts** plastic wheels are compatible but take character sequence into consideration before interchanging.
- **IBM** printwheels can only be used in IBM printers.



*Our Displaywriter wheels are the same quality as IBM's, but lower priced.*

## Be prepared for emergencies.

Since most printers use an average of 10 printwheels per year, why not keep several on hand? That way, you'll stop an emergency before it starts. And, besides saving valuable downtime, you'll save money on quantity discounts.

*Mix and match typestyles to achieve the lowest quantity discounts on these high quality printwheels.*

# Handy Packs make printout easier to use than ever before.

If you're like many of the microcomputer users we've surveyed, you probably don't use a lot of paper.

But, because you use your micro for a lot of different applications, you like to keep *several* types of forms on hand.

If this is the case, we've got the *perfect* solution. Inmac Handy Packs.

We've selected the 4 most popular forms and have made them available in small, convenient-to-use quantities.

> **"Every day I run at least three reports on my micro – each on a different form. Instead of pushing around those 50-lb. cartons (and breaking my back), I've started using your Handy Packs. They really get the job done!"**
>
> *—Regional Sales Manager*
> *Computer Distributor, Mt. View, CA*

We've also packaged them in special, easy-to-carry boxes that have a sturdy fold-down handle and a lid that closes tight. They're *lightweight* enough to carry several at once.

Use them to directly feed your forms into your printer or as handy storage boxes. Plan ahead, keep several boxes on hand.

*Each Handy Pack contains up to 1,000 sheets of high-quality printer paper. Ideal for small jobs, quick changes.*

Inmac
Printer
Paper
INMAC ORDER NO. 4980
1000 SHEETS 9½ x 11
1 PART 18-lb. BLANK

*Choose plain white for program listings, or even computer graphics. ½" green bar paper is ideal for most "standard" reports. Quick-read paper (⅛" spacing) makes dense reports easier to read.*

| Description | Size | Parts | Paper Weight | Ship Weight | Sheets/ Carton | Price/Carton 1-2 | Price/Carton 3-5 | Price/Carton 6-11 | Inmac Order # |

*Tears down from 9½" x 11" on marginal perforation.

# Pin-fed, pressure-sensitive labels that won't curl, smear or smudge.

All pressure-sensitive labels are not alike. This becomes annoyingly clear when you encounter peeling and curling . . . and labels that don't stick . . . or ones that leave a *gummy* residue (or half the label on) when you try to remove them.

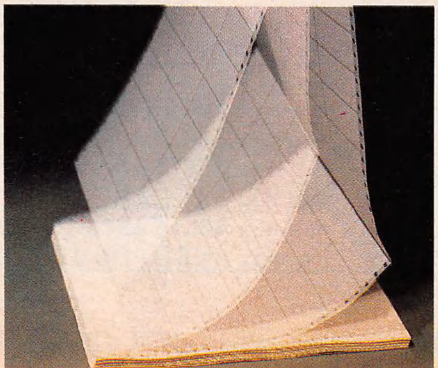
**Our continuous, fan-folding labels eliminate these common problems.**

Specially formulated adhesives ensure that our general-use labels *won't* curl or peel off.

Our tape reel label is coated with a multi-glue that permits easy removal and leaves no residue.

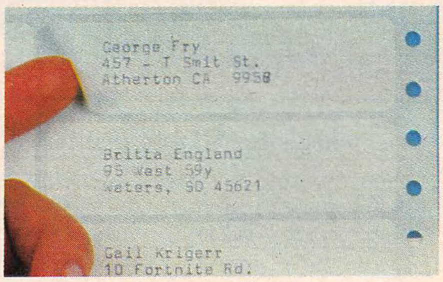
All our labels are *treated* for proper ink absorption. They won't smear or smudge.

*Our extra-heavy backing and deep perforations let your labels stack as neatly and uniformly coming out of your printer as they went in. Phone in your order today.*



Our special quad label for Cheshire machines has a calendered backing which prevents slippage in the machine and gives smooth, trouble-free operation.

Use these labels in your computer room, mail room or office. Phone in your order today and your labels will ship tomorrow.



*These labels leave no gummy residue.*

Convenient Order Form on Page 48

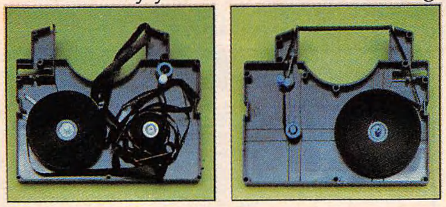
# Professionalize your reports! Use factory-fresh Good Impressions™ ribbons for crisp, jet-black printing.

Compared to all the ribbons available for your printer, Good Impressions ribbons (sold exclusively by Inmac) are the finest value on the market.

Why? Because we're sticklers for quality. And chances are, you are too.

You don't want the work you produce to look stale and gray. You want it to look fresh, clear and sharp!

That's why you should insist on using Good Impressions ribbons with your printer. They're the finest you can buy.



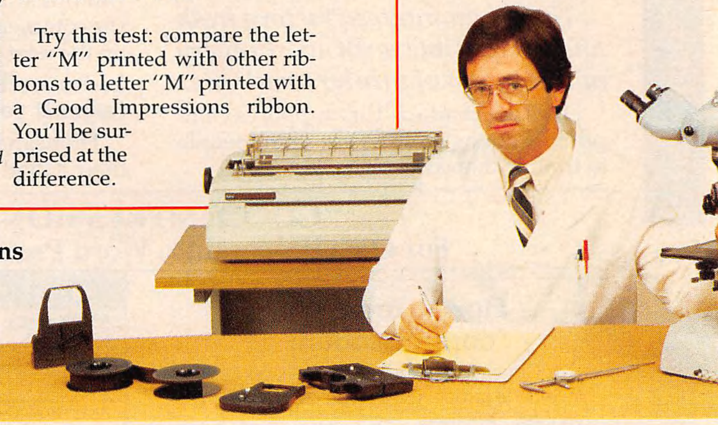
*Left: Inferior gearing and improper winding cause many ribbons to jam: Right: Good Impressions are jam-resistant.*

### Compare our quality with others.

*Good Impression: crisp, consistent.*

*Others: Fair, could be much better.*

Try this test: compare the letter "M" printed with other ribbons to a letter "M" printed with a Good Impressions ribbon. You'll be surprised at the difference.



**Good Impressions ribbons are sold exclusively by Inmac.**

*Good Impressions ribbons undergo the tightest, most stringent quality controls in the industry. The result is a fine-tuned ribbon engineered for image sharpness. They'll give you crisp, jet-black reports line after line after line.*

### No other ribbons are made like a Good Impressions ribbon.

Our fabric ribbons are woven to an exact thread count, precision cut and heat-sealed to prevent fraying.

*Make your reports professional. Use Inmac's quality "Good Impressions" ribbons.*

They're saturated with the finest inks. Specially formulated to produce a sharp, black image.

Then they're loosely twisted (unlike other ribbons that are tightly twisted or not twisted at all). This improves resiliency giving them the stamina to endure your printer's repeated pounding.

Our multi-strike film ribbons are built to the same stringent standards.

They're precision-coated and feature a unique gearing mechanism that gives smooth feeding, optimum ribbon tension and problem-free operation.

### Sealed-in freshness insures ultra-black, clearly defined printing.

There's nothing quite like a Good Impressions ribbon. It's so fresh that the plastic outerwrap even has a distinct "snap" when you open it.

Good Impressions ribbons are your best protection against anemic-looking reports. Turn to the next four pages to find the right one for your printer.

### One-Year Freshness Guarantee.

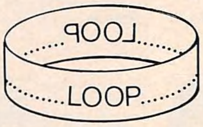
The quality control is so tight on these ribbons that every single Good Impressions ribbon you order is guaranteed to be "factory fresh" for one full year from your date of purchase.

Who makes the freshness determination? You do! If for any reason you're not completely satisfied, simply return them for a prompt refund, exchange or credit.

## Some hints to help you order the right ribbon.

You may be confused about the different types of ribbons available for your printer. If so, here's a simple explanation that should help:

**Multi-strike ribbons:** These are the highest quality you can buy. They're single pass ribbons that are advanced ¼-character at a time. Since they're made of a carbon Mylar™ film, they yield a much darker, cleaner and sharper impression than a nylon/cloth fabric ribbon.



**Nylon/cloth fabric ribbons:** These are continuous loop ribbons. They last about four times longer than multi-strike ribbons. Initial print is dark and wide, but goes lighter and narrower after prolonged usage. They'll always print, but how long you use them depends on your level of print quality acceptability.

## What our customers say about Inmac ribbons:

*"Just wanted to let you know how pleased I am with your ribbons.*

*"I've checked around and you've by far got the cheapest prices on ribbons for my Xerox 1720!*

*"Besides the price, I appreciate the quality. My Inmac ribbons don't break like others I've used.*

*"Thanks again."*

**—Jakki Carey,**
**Word-Processing Secretary,**
**Core Labs Int., Dallas, Texas**

*"We've got an LP2 printer that we really put through the paces. We wanted to improve our printer quality so we switched to your 'Good Impressions' ribbons.*

*"Right from the start they printed much darker—they're easily 100% better than the Data General ribbons we were getting before! Keep up the good work."*

**—Kevin Reed,**
**Data Processing Manager,**
**Thomas Systems, Fort Worth, Texas**

# Ribbons for more than 800 printers available as fast as overnight!

*On these four pages, you'll find one of the largest selections of ribbons available in the industry.*

*They're guaranteed factory fresh and compatible with nearly every major brand of printer available.*

Of all the products that support a computer, ribbons seem to get more people in trouble than any other.

The reason's simple.

They're always running out of them.

And it never fails. They always seem to run out at the worst possible time. (See the comments from one of our customers on the next page.)

**24-hour ribbon shipment. Even faster if you're in a hurry!**

Thousands of computer users order their Good Impressions ribbons from

*Inmac shippers are the fastest in the country.*

And in addition to wanting a high quality product, one of the big reasons they order from us is:

## "GOOD IMPRESSIONS"™ RIBBON SELECTION GUIDE
## For Data Processing, Word Processing & Personal Computing Applications

### How to order the correct ribbon:

**1.** Check this alphabetical list of printers to find the Inmac ribbon type (A, B, C, etc.) your printer takes.

**2.** Match that letter to the corresponding photograph to double-check that you've found the correct ribbon for your printer.

**3.** Then simply phone or mail in your order.

(Note: The Inmac order number and price are listed with the photograph.)

### Choose from two types of ribbons:

Many printers will use either film or fabric ribbons. Here's how to decide which one is right for you:

**1. Multi-strike film ribbons—for the finest impressions.** Only the highest grade Mylar™ polyester film is used for these ribbons. It's precision coated, cut and wound to insure clear, sharp, highly professional reports.

**Recommended use:** for printing high-quality documents, in-house reports and client correspondence.

**2. Nylon/cloth fabric ribbons—made to last and last and last!** These ribbons are made from the finest fabric materials. They're meticulously woven to an exact thread count, and cut and heat-sealed to prevent fraying. Then they're wound "loosely" for maximum ink retention, livelier resiliency and longer life.

*Our ribbons are guaranteed compatible with your printer.*

**Recommended use:** for printing high-volume internal documents, reports, etc. Primarily used on high-speed printers. Gives high image-density for extended periods of usage. Lasts about four times longer than a multi-strike ribbon.

### Can't find the ribbon you need? Call us. We've got lots more!

If you don't find the Good Impressions ribbons you need in the charts below, please call your nearby Inmac branch.

Our customer service reps have ex-

## "GOOD IMPRESSIONS"™ RIBBON SELECTION GUIDE

Convenient Order Form on Page 48

# Take the guesswork out of selecting the right modem for your communication needs—and depend on Inmac to ship the product you want within 24 hours!

You will need a modem if you want to exchange data between local or remote computers, subscribe to one of the nationally available data bases or participate in a local PC users' "bulletin board."

## To use a modem:

- Get the proper communications software package if your microcomputer requires it.
- Learn about the telephone equipment located at the computer you want to transmit to and receive from. You must match the baud rate of the modem in use there. Usually, commercial data bases have a Bell Standard 103 or 212A modem; many local bulletin boards use a 103. If you're going to communicate with your office's mini- or mainframe computer, ask your data processing manager what modem is used.
- Match the speed of the modem you'll be communicating with, usually 300 or 1200 Bauds. A 1200-Baud modem transmits four times faster than a 300-Baud modem. That could save you money in time charges for telephone and data base use.
- Check your own telephone equipment. If you have wall-to-base and base-to-handset modular RJ-11 plug-in jacks, you can use any modem available from Inmac. If you have rotary dial phones with permanent wiring, you can use an acoustic coupler modem only.
- Select the modem best suited to your needs, according to the specifications supplied here. Full duplex operation, standard on all Inmac modems, means the message you transmit is received by the other computer and then repeated back to your screen or printer. It verifies reception at the other end. Half duplex operation does not provide the "echoed" transmission.
- Phone us with your order. Your Inmac Sales Representative will be glad to help you.

## For high performance at a great price, get our 300 Baud direct connect modem.

This full featured, direct connect modem gives you super-clear data transmission even in a noisy business office. And at $125, it's Inmac's lowest priced modem.

Because it works between your telephone's base and handset, you must have modular plugs at the handset and base. (If you don't our Small Talk modem connects between modular plugs at the base and wall.)

The 300-Baud direct connect modem is designed for full duplex operation. It stays in the answer mode until a carrier is detected, when it switches automatically to the originate mode.

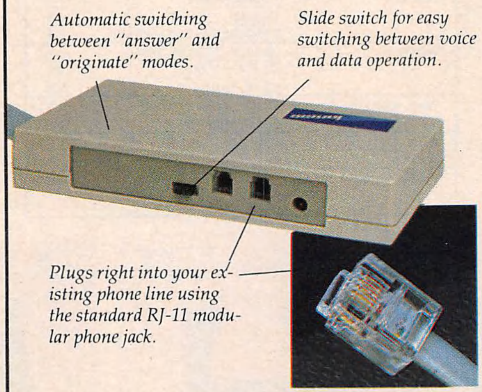
An inexpensive 9-volt battery supplies 50 hours of power, and a beeping tone lets you know when to replace it. Compatible with Bell 103 and 300-Baud acoustic couplers, this unit comes complete with a 16" EIA RS232 cable connector and an RJ-11 phone cord with plugs for fast, easy set-up.

<ins>**Clear Signal 300-Baud Direct-Connect Modem.**</ins> Includes operating instructions and cables. Dim: 11¾"d. x 2⅜"h. x 7¼"w. Wt: 1 lb., 12 oz. Full duplex operation. Has a male EIA RS232 25-pin connector. Battery not included.

| Price each: | Qty. 1 | 2-4 | 5-9 |
|---|---|---|---|
| No. 8065P2 | $125 | $120 | $115 |

**Power Cord with 9-Volt DC Adapter.**

| Price each: | Qty. 1 | 2-4 | 5-9 |
|---|---|---|---|
| No. 8066P2 | $9.50 | $9.00 | $8.50 |



*Automatic switching between "answer" and "originate" modes.*

*Slide switch for easy switching between voice and data operation.*

*Plugs right into your existing phone line using the standard RJ-11 modular phone jack.*

*Our new direct-connect modem lets you communicate over long distances with other computers and terminals.*

*Please note: This modem is a manual device, not auto-answer, and operates with modular telephones only.*

## Modem shoppers—Buy a modem and get a subscription to THE SOURCE℠ AMERICA'S INFORMATION UTILITY

For a limited time only, when you buy any modem on these two pages, you'll receive a subscription to THE SOURCE℠ <ins>without paying a registration fee</ins>... plus a free hour of daytime access.

**Like getting a modem for $25!**
THE SOURCE℠ is a timesharing network of information services and programs—from business news and financial reports, to electronic mail, catalog shopping, travel guides and more!

To subscribe, you'd normally have to go to a computer store and pay a registration fee ...then buy a modem for $125 or more.

But if you order before December 1, you can get the modem <ins>and</ins> subscription package for the price of the modem alone!

To get your password and I.D. number from THE SOURCE, just phone in the code you'll find on the subscriber agreement, along with your MasterCharge, Visa or American Express number before December 31, 1983. Remember, you must order your modem by December 1, 1983.

Bonus for modem shoppers!

*Buy a modem . . get a subscription to*

# Our 212A modem automatically dials and answers, lets you choose to communicate with 300- or 1200-Baud —and is Hayes Smart modem compatible!

Our 212A modem operates unattended, sending and receiving at 0-300 or 1200 Baud, automatically dialing the telephone number you enter at your keyboard, answering incoming calls—if you choose—letting you use your telephone for voice transmission, and much more!

Because the 212A works at either Baud rate, you have the choice of communicating with systems transmitting at 0-300 or 1200-Baud. The 212A works with Bell 103, 113 and 212 direct connect modems.

Select permanent auto answering, to answer all incoming calls, or controlled auto answer, and the 212A will answer only those calls received during the times you designate. To save time and money, the 212A automatically disconnects if the line goes bad, if there is too much time between data transmissions or if the transmit mode isn't operating constantly.

Our 212A provides full or half duplex operation, connects directly to your modular RJ-11 telephone and will hook up to any computer using a standard RS232C interface.

Dim: 9.5"l. x 5.5"w. x 1.5"h. Wt. 4 lbs. Alum.

| | Qty. 1 | 2-4 | 5-9 |

| **No. P/N8071P2** | **$595** | **$580** | **$570** |

inmac
Auto Dial 212A

## Small Talk saves space and gives you the extra convenience of auto answer.

Here's a 300-Baud modem that, at a featherweight 4.2 ounces, is so compact you can even stick it to the side of your telephone!

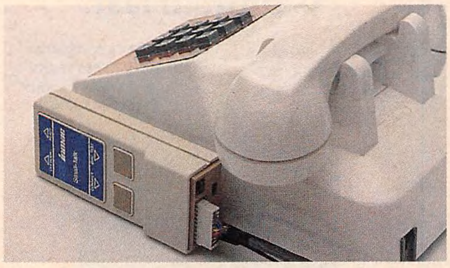
Its automatic answering means you don't need to be there to put it in the correct transmit or receive mode—Small Talk answers unattended. Other features help speed repetitive sign-on routines to access your data base.

LED's give you a constant status report, and audio signals alert you when Small Talk has a dial tone or a busy signal or has accepted a call.

A direct connect modem, Small Talk works with other 300-Baud, Bell Standard 103 modems and connects to your telephone through a modular RJ-11 jack. It's compatible with any terminal or computer using a standard EIA RS232C interface.

Dim: 5.0"l. x 1.9"w. x 1.9"h. Wt. 4.2 ozs.

| | Qty. 1 | 2-4 | 5-9 |
|---|---|---|---|
| **No. P/N8063P2** | **$149** | **$144** | **$140** |



inmac
Small-Talk

## High speed 1200-Baud modem speeds data transmission and cuts costs!

Our high-speed, 1200-Baud modem cuts your PC-time telephone bills by transmitting data four times as fast as a 300-Baud device. You move through menus quicker, get to the information you want faster and save money, too!

Full duplex operation helps determine transmit errors—and increases your savings—by allowing both communicating systems to transmit simultaneously.

Your 1200-Baud modem from Inmac comes with the cable to connect it directly to any modular RJ-11 telephone, and any EIA RS232 cable will connect it to your microcomputer.

It's powered by your telephone line, so you aren't tied to an AC outlet location.

**1200-Baud Modem.** Powered by phone line. Includes telephone-to-modem modular RJ-11 cable. 6⅛"w. x 1⅛"h. x 9½"l. 1 lb.

**No. 8070 P2**

| Qty. 1 | 2-4 | 5-9 |
|---|---|---|
| **$445** | **$430** | **$424** |

## Inmac's 300-Baud Acoustic Coupler makes swapping data as easy as calling home!

Here is the cost effective way to exchange data with distant computers—regardless of your location.

It's portable, so you can take it with you, and no special data transmission lines are required. It's Bell 103 compatible and interfaces with most EIA RS232C computers and terminals at 0-300 Baud. And, with the right connecting cable (check page 33 ) you need make only two plug-in connections and you're ready to send and receive data from your hotel room or a public telephone.

Just dial the telephone, insert the handset into the sealing cups and flip a switch.

**300 Baud Acoustically Coupled Modem.** Includes operating instructions and power cord with AC adapter. Dim: 10"l. x 4"h. x 5½"w. Wt: 1 lb. 8 oz. Operates in both full and half duplex modes. Has a female EIA RS232 25-pin connector.

| | Qty. 1 | 2-4 | 5-9 |
|---|---|---|---|
| **No. 8045 P2** | **$179** | **$169** | **$160** |

## We have long phone cord for less!

*Snap-in cable extends your phone's reach in seconds.*

Why pay phone company prices for the freedom to put your phone or modem, or both, where you want them?

We have the same 14' and 25' modular jack (RJ-11) snap-in cables for standard telephones and modems at a lower price...and you get quantity discounts!

**Telephone Extension Cable.** Fits standard phone and modem jacks. Clear color.

| | Qty. 1 | 2-4 | 5-9 |
|---|---|---|---|
| **No. 499-1 P2** (14 ft.) | **$4.50** | **$4.25** | **$3.75** |
| **No. 499-2 P2** (25 ft.) | **$6.00** | **$5.25** | **$4.75** |

Convenient Order Form on Page 48

# Multiport T-Switches help you save money by sharing peripherals and making full use of your system's potential.

Flip one convenient Inmac T-Switch to share an expensive printer or a modem, change from your report quality to your letter quality printer, or use your microcomputer as a terminal to access a larger machine.

You can control from two to six peripherals instantly, and without cables or equipment.

And by piggy-backing T-Switches, you can build a switching network to expand the capabilities of your present system without adding redundant equipment!

**With one Inmac T-Switch, you can...**

Use two printers (slower, for letter quality and faster, for report quality) to support one microcomputer's word processing applications.

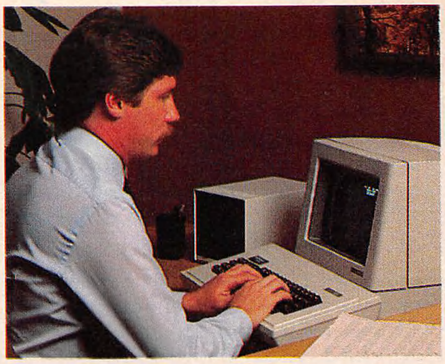
Use one printer to support several microcomputers.

For dependability and long life, every Inmac T-Switch utilizes rugged PC board construction (no hard wired connections) and silver alloy plated contacts in the rugged rotary switch.

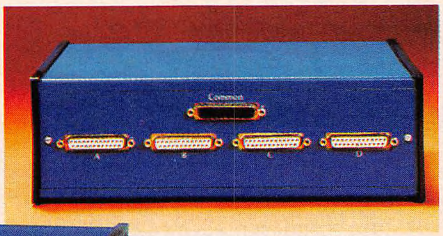
Give us a call and we'll make sure you get the T-Switch you need.

**Compatible with EIA RS232 and Centronics type equipment...**

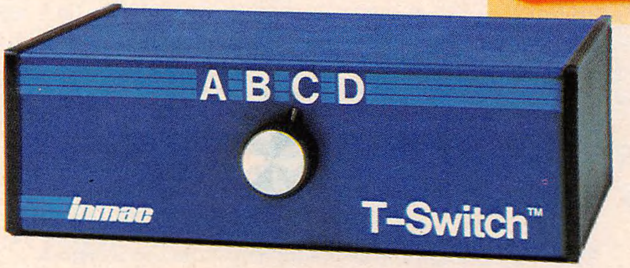
As you see from the lists that follow, we offer T-Switches with RS232-compatible 25-pin connectors and Centronics type 36 pin connectors.



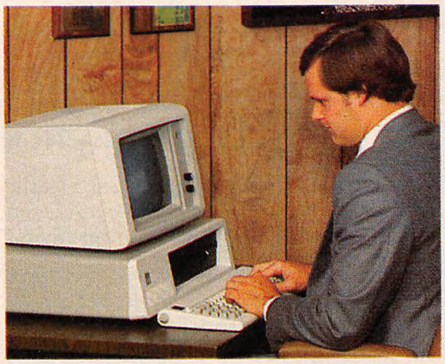
*Inmac T-Switches come in handy for shared access to a common I/O port of the company's minicomputer.*



*In the office our T-Switch can save you a bundle by letting a single printer service multiple microcomputers.*



*This T-Switch No. 372-4 (above) lets you connect any of four devices to a common line. RS232-compatible.*

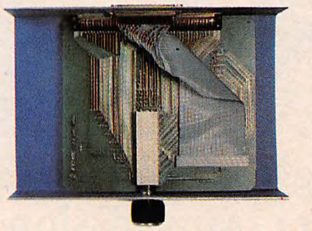


A B
Inmac
T-Switch™

## The Inmac T-Switch is built to last.

*Rigid PC board construction cuts cross talk and line interference.*

*Connectors are soldered directly to board and crimped to ribbon cable for greater reliability.*

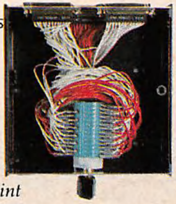


*Rugged rotary switch has silver alloy plated contacts, Valox 420 and 10,000-operation life expectancy. Contact resistance: .015 ohms max. Current capacity: 2 amps.*

## With others you take your chances.

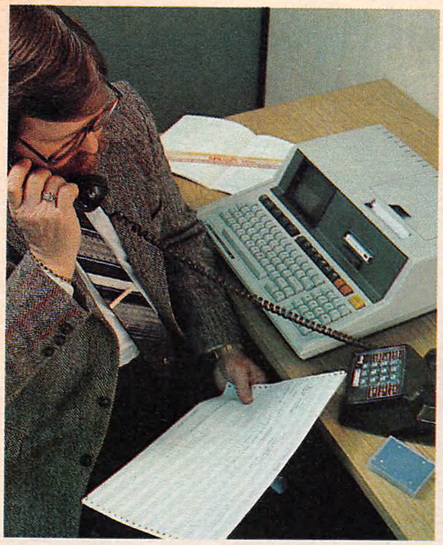
*Connections are hard wired.*

*Some contacts aren't insulated; shorts possible.*



*Point-to-point wiring induces cross talk.*

*Wires can easily break or come loose.*



# T-Switches for RS232 & applications.

**2-Device T-Switch for 9-line and 15-line RS232 cables.** Controls 2 devices. Has 3 connectors. Switches lines 2-8, 12, 14-17, 20, 22 and 24.

| Price each | Qty. 1 | 2-4 | 5-9 |
|---|---|---|---|
| No. 373-2P2 | $143 | $133 | $126 |

**2-Device T-Switch for 25-line RS232 cables.** Controls 2 devices. Has 3 connectors. Switches lines 2-25.

| Price each | Qty. 1 | 2-4 | 5-9 |
|---|---|---|---|
| No. 372-2P2 | $147 | $137 | $130 |

**4-Device T-Switch for 25-line RS232 cables.** Controls 4 devices. Has 5 connectors. Switches lines 2-25.

| Price each | Qty. 1 | 2-4 | 5-9 |
|---|---|---|---|
| No. 372-4P2 | $185 | $178 | $174 |

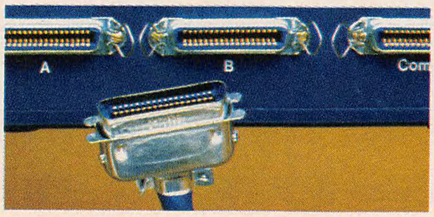
*For 5 to 1 applications order our 372-6 6 to 1 switch.*

**6-Device T-Switch for 25-line RS232 cables.** Controls 6 devices. Has 7 connectors. Switches lines 2-25.

| Price each | Qty. 1 | 2-4 | 5-9 |
|---|---|---|---|
| No. 372-6P2 | $220 | $211 | $207 |

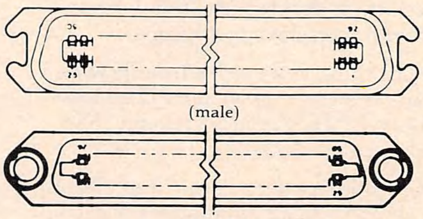
**2-Device T-Switch for 36-pin Centronics Type Connectors**
Has 3 Inmac Centronics type 36-pin female connectors on rear panel. Switches all 36 lines.

| Price each | Qty. 1 | 2-4 | 5-9 |
|---|---|---|---|
| No. 382-P2 | $220 | $211 | $207 |



*As shown in the diagram below, multiple micro users can use a T-Switch to access a common printer. A quick call to the Department Secretary is all it takes to determine whether the printer is free.*

**Centronics type connectors**



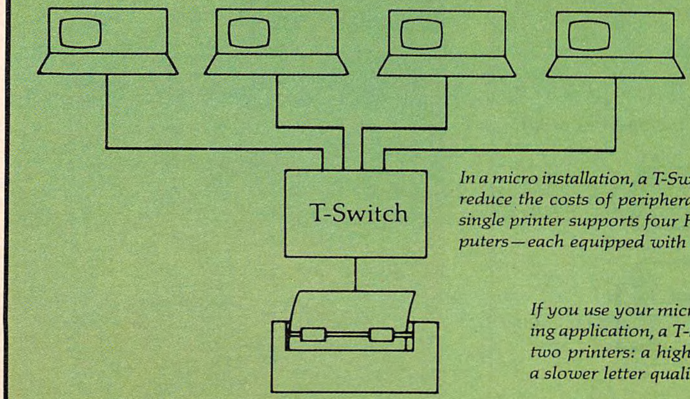
**T-Switch Cables.** Two male Centronics type connectors.

| | | |
|---|---|---|
| No. 323-1P2 | 10 ft. | $64 |
| No. 323-2P2 | 20 ft. | $73 |
| No. 323-3P2 | 30 ft. | $83 |

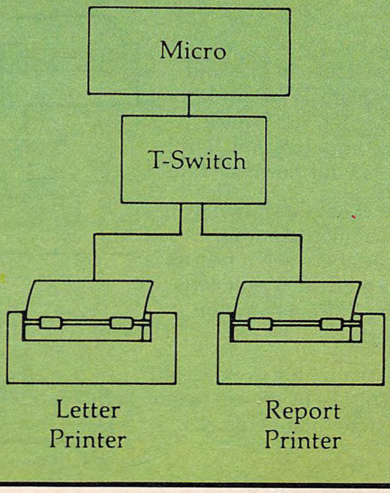
**Extension Cables.** One male and one female Centronics type connector.

| | | |
|---|---|---|
| No. 324-1P2 | 10 ft. | $64 |
| No. 324-2P2 | 20 ft. | $73 |
| No. 324-3P2 | 30 ft. | $83 |

## Use them to expand your micro or WP system.



*In a micro installation, a T-Switch can dramatically reduce the costs of peripheral equipment. Here a single printer supports four HP-85 personal computers—each equipped with an RS232 interface.*



*If you use your microcomputer for word processing application, a T-Switch lets you select between two printers: a high speed model for reports and a slower letter quality model for correspondence.*

Convenient Order Form on Page 48

# Save money! Get the expansion power of two T-switches in one pint-sized module.

Our Mini-T-Switch takes all the cost-efficient time-saving features of our standard switches and squeezes them into one compact module.

**Put lazy peripherals to work!**
Actually two T-switches in one, each of the Mini's two selector knobs allow two peripherals to share a common third component. For example, the top switch on the dual module could allow two microcomputers to alternately access a common printer while the bottom switch lets two other terminals share a common modem or a single I/O port.

The configurations are limitless, and your savings will be tremendous.

**Small in size...big on quality.**
Because it's so compact, the Mini-T-Switch is perfect for desktop use. But we didn't stop with convenient packaging.

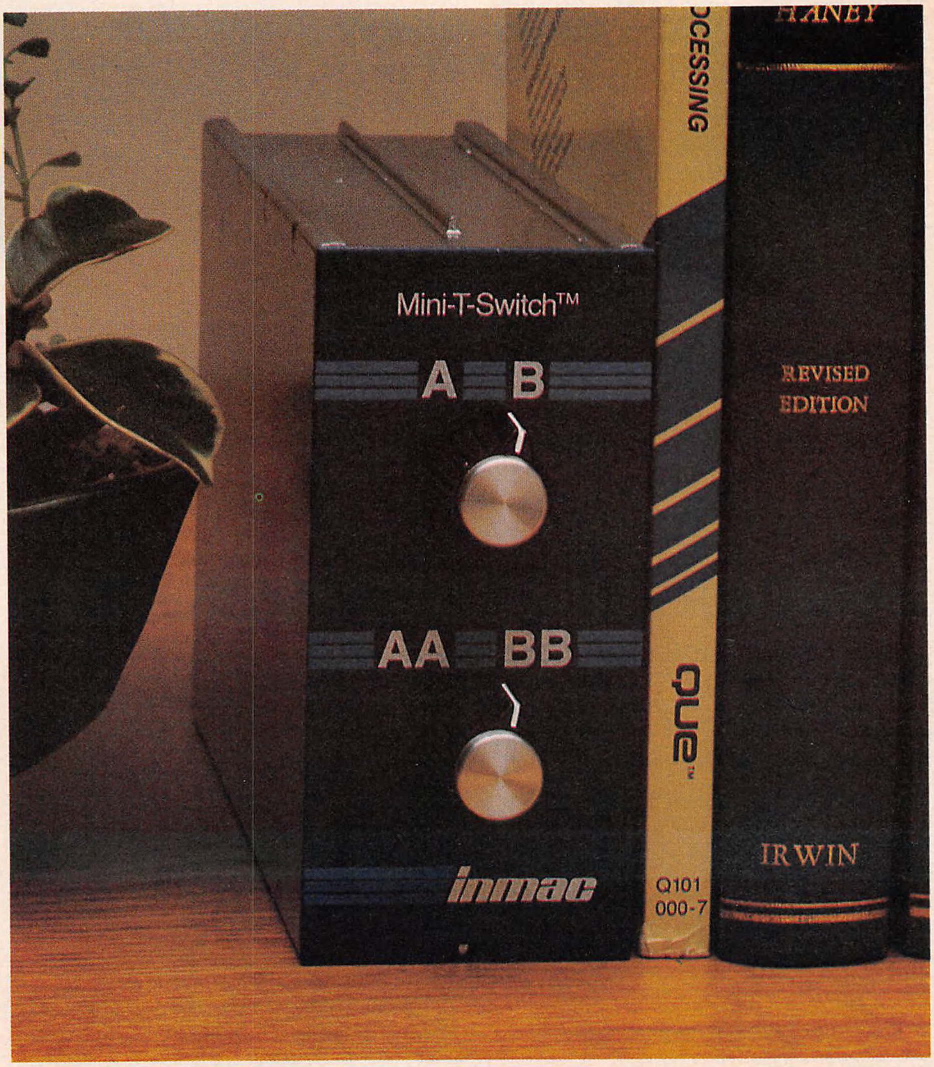
The last thing you need is trouble with a transfer switch, so we use PC boards exclusively. They're more reliable than handwired products.

Some manufacturers use a cheap plastic case. We use an all-aluminum enclosed housing that helps keep FCC-regulated EMI/RFI emissions in check.

**Now's your chance to experiment.**
Order your new Mini-T-Switch and try it out risk-free for 45 days. If it's not right for you, send it back for a prompt, no-questions asked refund.

**Dual Two-Port Mini-T-Switch for 25-line RS232 Cables.** Has six 25-pin female connectors. Switches lines 1-25. Dim: 4¾"h. x 2¼"w. x 6¾"d. 2 lbs.

| Qty. | 1 | 2-4 | 5-9 |
|---|---|---|---|
| **No. 111P2** | **$230** | **$220** | **$210** |



*The Mini-T-Switch is actually two separate transfer switches in one compact, economical module that measures only 4¾" h x 2¼" w x 6¾" d.*

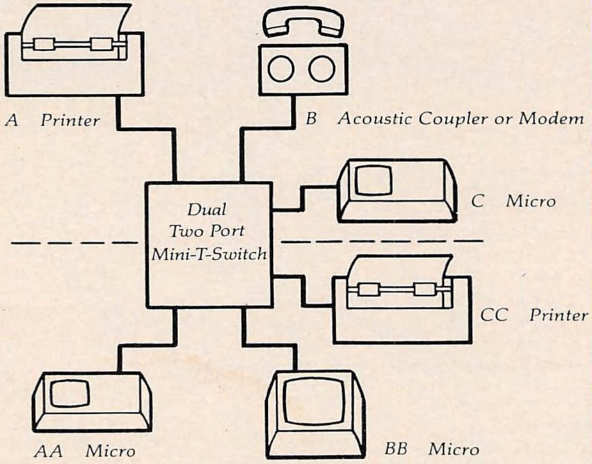
*The Mini-T-Switch comes with RS 232 connectors, so it's compatible with most common peripherals.*

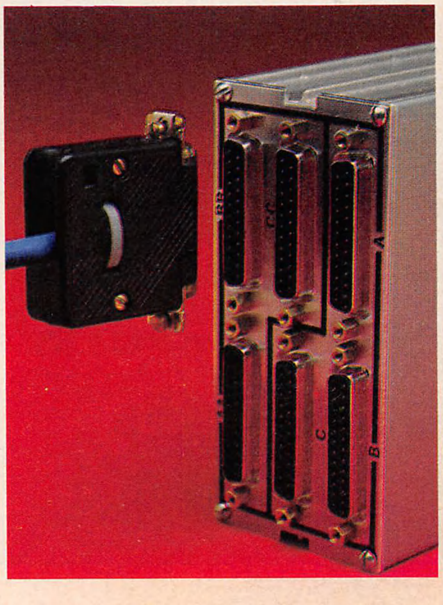
## It's easy to custom tailor to your needs.

Two switches in one, our handy Mini-T-Switch lets you "switch" or "share" microcomputers and peripherals as your needs dictate.

In the example shown at right, a microcomputer switches between a printer and a modem. While two micros share a common printer.

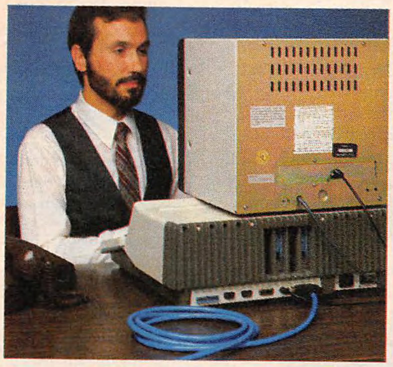
You'll realize big savings and convenience by creating your own switching networks.





Convenient Order Form on Page 48

# Put your computer power where you want it! EIA cables let you move your CRTs, terminals & printers.



*We've got shielded and standard EIA cables in the lengths you need for your microcomputer.*

## Micro users! Use EIA cables for your modems & serial printers

A lot of micro users are surprised to find that the same EIA cables used with large minicomputer systems are exactly what they need for their smaller business computers.

And they're even more surprised when they find that Inmac has 102 different EIA cables to choose from... all in stock ready to be shipped out within 24 hours.

**Short lengths especially for micros.**

For most micro applications, our 7′ or 10′ EIA cables should do quite nicely. They're listed with their different pin configurations on the next two pages.

Need shorter cables? Just call us.

**If your micro or serial printer is listed below, it's EIA-compatible.***

**Microcomputers**

Apple
Altos
Archives
CCS
Commodore
Cromemco
Dynabyte
Eagle
Heath-Zenith
HP
IBM
North Star
Osborne
Radio Shack
Sanyo
Televideo
TI
Toshiba
Vector
  Graphics
Victor
Xerox

**Serial Printers**

Qume
Smith-Corona
TI

**This is a partial listing; check your owner's guide.*

> **It's great to get our cables in 2 to 3 days. Other companies have to custom make them, but Inmac has cables in stock for all types of setups!"**
>
> *—Milt Wolf, Technical Support Manager*
> *Sunkist Growers, Sherman Oaks, CA*

**Special Note For Parallel Printers!**

Micros using parallel-interfaced printers may not be EIA-compatible. They may require special interface boards and cable. **Turn to page 34** or give us a call and let us know what kind of equipment you have and we can quickly supply you with the right cable in the length you need.

Don't let the short cables that came with your components keep you tied to the computer room. Use our EIA RS232 cables to place each of your peripherals where it'll serve you best.

**As easy as moving a lamp with an extension cord!**

You can put CRT's at your customer service counter, in your accounting department, out in the warehouse, or anywhere else you need them.

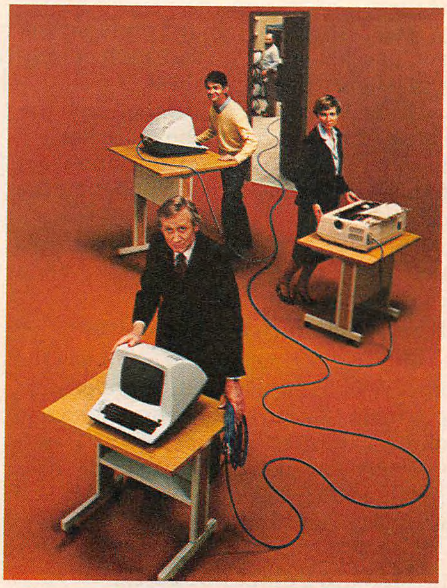
And instead of listening to noisy line printers all day long... let our EIA extension cables put them out of the way in acoustically isolated areas.

**Use this handy chart.**

Determine how far you need to go then use this chart to find which EIA cable or device best suits your needs.

**EIA RS232 Cable/Device Selection Chart**

| EIA Cables and Devices | Data-Carrying Capability | Catalog Page Ref. |
|---|---|---|
| ● **Standard EIA cables** (Plastic hoods) | 0-100 ft. | 33 |
| ● **Shielded EIA cables** (Molded hoods) | 0-150 ft. | 32 |
| ● **Shielded EIA cables** (Metal hoods) | 0-150 ft. | 32 |
| ● **Modem/Acoustic Coupler** | 150 ft.-3000 + miles | 26, 27 |



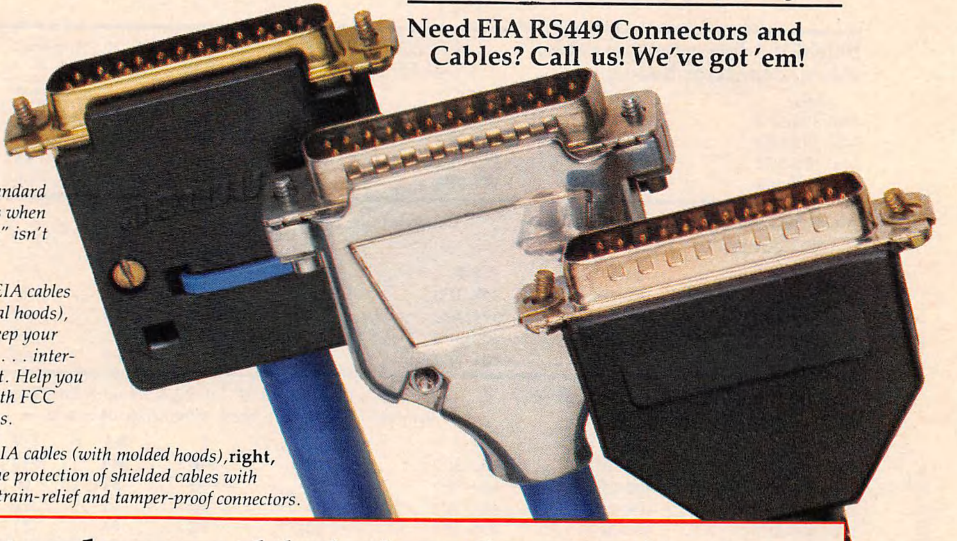
*EIA cables are like "computer" extension cords. Use them to place your peripherals where you need them.*

**EIA cables are also available in special lengths!**

If you need an EIA cable in a length different from the standard lengths listed on the following two pages, just give us a call and we'll build one for you.

We can ship you up to 5 custom-length cables within 10 days. Orders for more than 5 might take a few days longer.

**Need EIA RS449 Connectors and Cables? Call us! We've got 'em!**



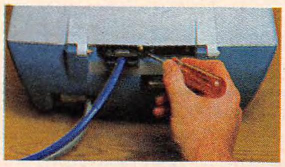
*Choose standard EIA cables when "shielding" isn't required.*

*Shielded EIA cables (with metal hoods),* **center,** *keep your signals in . . . interference out. Help you comply with FCC regulations.*

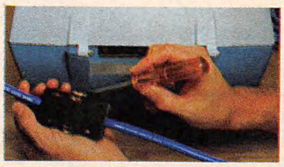
*Shielded EIA cables (with molded hoods),* **right,** *combine the protection of shielded cables with stronger strain-relief and tamper-proof connectors.*

## Extend your cable in less than 5 minutes.

It's as easy as using a standard household extension cord:



**1.** *Disconnect your current EIA connector.*



**2.** *Connect the mating Inmac EIA cable in the length you require.*

**3.** *Connect the other end of the cable to your terminal. And you're done!*

# Shielded EIA extension cables keep noise out...signals in!

As an efficiency-minded professional, you naturally want to place each peripheral where it serves you best.

Unfortunately, the farther an unshielded cable travels, the more likely it is to pass by equipment or fluorescent lights whose emissions can penetrate the cable.

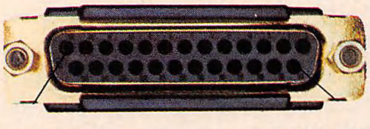
This electrical interference corrupts your transmissions with static, alien characters or dropouts.

**Keep your signals clean & true.**

Our RS232 shielded cables protect the integrity of your data with a tinned-copper braid that surrounds the conductors and is 100% grounded for safety.

They're insulated with a special PVC rated to 80°C, 300 volts, and are UL and CSA listed and approved.

## How to select your EIA extension cable.



**Look at the connector on your CRT or printer and match the pin positions and gender by using the photographs below. (Shown here is a female connector. It's pin numbering is a mirror image of a male connector.)**

*The cables on this page are fully tested for shielding effectiveness. They help you comply with the new FCC regulations.*

Because they're such an effective barrier against outside noise ... these cables are the best protection you can give your data-carrying signals.

**Two shielded connector hoods to choose from: "metal" or "molded".**

If you do much rewiring with your cables, you'll want die-cast metal hoods. The zinc-chromate castings unscrew to give you easy access to the pins.

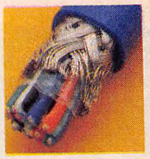
On the other hand, if you want a tamper-proof connector that has the added benefits of a super-strong, bonded strain relief, choose our injection-molded PVC hoods.

Both provide the same high-degree of shielding effectiveness.

## The finest cables you can buy.

*Tough PVC-insulated jacket rated to 80°C, 300 volts.*

*Tinned-copper braid gives this cable it's tremendous shielding effectiveness.*



*Each conductor wire is color-coded for fast identification.*

*Molded connector hoods have copper foil shield surrounded by injection-molded PVC to fully shield your signals.*

*Metal connector hoods have die-cast, zinc-chromate casings to give your signals fully shielded protection.*

**Helps you comply with new FCC regulations.**

The FCC recently passed an act limiting allowable emissions from commercial and personal computers. When properly used, our shielded cables can aid in meeting these new specifications.

**Call today for shipment tomorrow!**

Use this chart to order the molded- or metal-hooded EIA cables you need. All the cables listed below are in stock ready to be shipped within 24 hours.

**Shielded 4-line extension cable. (Metal connector hoods)**

Extends lines 1, 2, 3 & 7 with lines 8 & 20 jumpered together for handshaking signals.

# Save with standard EIA cables when you don't require shielding.

Unshielded, high performance EIA extension cables are designed for microcomputer applications—and if you don't need shielded cabling, why pay extra?

Each is PVC insulated and rated to 80°C at 300 volts and meets UL and CSA safety requirements. Shatter resistance connector hoods are made of thermal plastic to provide long-lasting protection to the pin assemblies. And you can choose the length you need, from a convenient 10 feet to an economical 100 feet.

*We ship these quality EIA RS232 extension cables within 24 hours!*

**Standard 4-line extension cable. (Plastic connector hoods)** *Extends lines 1, 2, 3 & 7 with lines 8 & 20 jumpered together for handshaking signals.*

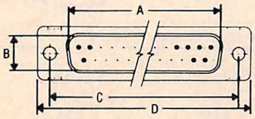
## High quality male or female EIA RS232 connector kits are shipped in 24 hours.

Our complete EIA standard RS232C 25-pin connector kits have gold-plated pins for maximum conductivity. But they're plated only where it's needed.

Selective plating assures you that the gold is where you need it most—at the contact point.

Buy a complete package of male/female connectors, screws and protective hood, or get the one item you need.



| Dimensions | 25 (female) | 25 (male) |
|---|---|---|
| A | 1.511″ | 1.534″ |
| B | .311″ | .329″ |
| C | 1.852″ | 1.852″ |
| D | 2.088″ | 2.088″ |

**Male crimp-type pins.**
Kit includes 25 pins, connector, hood, mounting screws and strain relief.

| | Model | Qty. 1 | 2-4 |
|---|---|---|---|
| Connector Kit | 815P2 | 10.00 | 9.20 |
| Connector & pins only | 812P2 | 6.45 | 5.93 |
| Extra pins (pkg. 10) | 806P2 | 2.40 | 2.21 |

**Female crimp-type pins.**
Kit includes 25 pins, connector, hood, mounting screws and strain relief.

| | Model | Qty. 1 | 2-4 |
|---|---|---|---|
| Connector Kit | 810P2 | 14.00 | 12.88 |
| Connector & pins only | 811P2 | 11.00 | 10.12 |
| Extra pins (pkg. 10) | 801P2 | 3.50 | 3.22 |

**Hardware for above.**

Connector Hood
No. 852P2 .................... $1.25

Female mounting screws (package of 2).
No. 853P2 .................... $1.00

Male mounting screws (package of 2).
No. 857P2 .................... $ .75

**Pin insertion/extraction tool.**
For crimp type pins. (Not a crimping tool).
No. 890P2 .................. $4.50 ea.

## Using a gender-changer is faster and easier than modifying or replacing EIA RS232 cables that won't mate.

If EIA RS232 cables won't mate, here's the alternative: our compact gender-changer. All 25 pins are live, so it works with any EIA cable you have. Order several to save yourself the frustrations of make-shift modifications.

Gender-changer saves hassle of modifying or replacing non-mating EIA RS232 cables.
NEW

*Gender-changer saves hassle of modifying or replacing non-mating EIA RS232 cables.*

**Compact gender-changer (F-F).**
No. 328P2 .................. $30 ea.

**Compact gender-changer (M-M).**
No. 329P2 .................. $30 ea.

## Modem bypass allows direct connections.

Now you can eliminate the need for two modems when connecting a terminal device (DTE) to the modem communication port on your Micro or to another terminal.

**General purpose null modem (F-F).**
No. 276P2 (7 signals, plus ground) .... $30 ea.

**General purpose null modem (M-F).**
No. 277P2 (7 signals, plus ground) .... $30 ea.

*Each null modem has two RS232 25-pin connectors wired together forming a 12-inch cable.*

Convenient Order Form on Page 48

# Personal computer users! We've got the cables you need to get up and running…fast!

Finding the right cable for your PC and printer used to be tough.

Computer distributors took weeks, even months, getting them to you. Computer stores never seemed to have them in stock. And searching through magazine ads hoping to find the right one was frustrating at best.

Of course the worse part was, if you did find one, chances were good that when it finally arrived…it wouldn't work.

**Inmac solves the problem!**

We've made getting the right cable for your new printer…fast and simple.

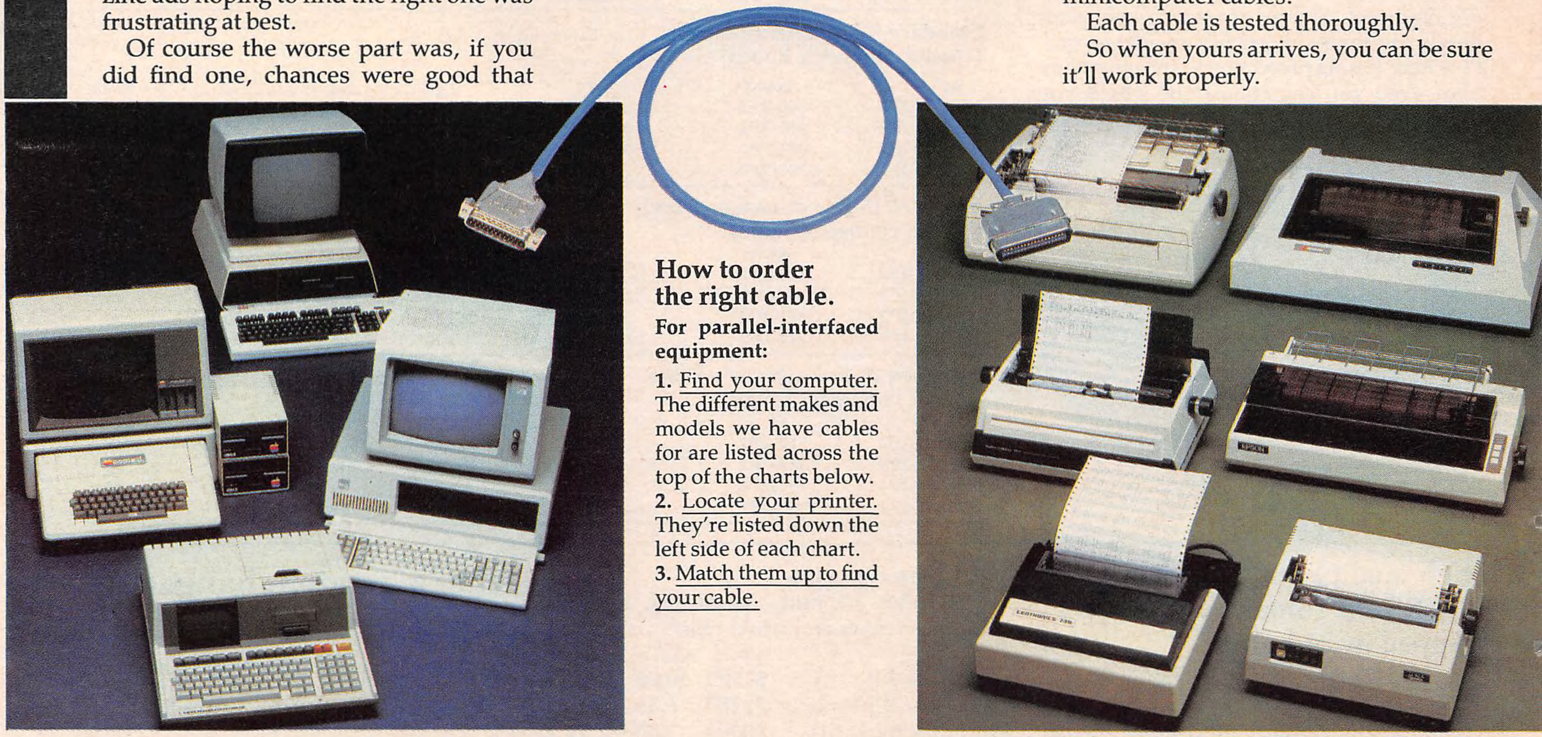
Just use the charts to match your computer up with your printer. Then order the specified cable. We'll ship it out within 24 hours. So you'll get it pronto!

**Quality you can count on.**

We've researched the wire lists and built these cables with the same high quality components and standards used in our minicomputer cables.

Each cable is tested thoroughly.

So when yours arrives, you can be sure it'll work properly.



### How to order the right cable.

**For parallel-interfaced equipment:**

1. Find your computer. The different makes and models we have cables for are listed across the top of the charts below.
2. Locate your printer. They're listed down the left side of each chart.
3. Match them up to find your cable.

*Systems courtesy of Altos, Orange Micro, and Computerland/Santa Clara.*

## Cables for Serial-Interfaced Equipment

### Here's how to order:

If your personal computer, printer or modem is serial-interfaced, then it's probably EIA compatible.

To help you hook any of these components together, we've got a full selection of EIA cables (shielded and non-shielded) in lengths ranging from 7 ft. to 100 ft.

**EIA-compatible serial-interfaced components ***

**Personal Computers**
- Apple
- Altos
- Archives
- CCS
- Commodore
- Cromemco
- Dynabyte
- Eagle
- Epson
- Heath-Zenith
- HP
- IBM
- North Star
- Osborne
- Radio Shack
- Sanyo
- Televideo

### Internal cables for IBM and Apple interface cards.

If you have an interface card with alternate I/O ports, like a Persyst or Quadram, we can build the internal cable (and provide a mounting plate) to connect the card to the back panel of your computer. Call us with your requirements.

### Centronics interface kit eliminates need for custom cable.

At last, a cable "solution" kit that lets you hook up your RS232 microcomputer interfaces with 36-pin parallel printers—for dozens of applications. Micro end of cable is unterminated (create your own configurations). Printer end is fully loaded. Includes *all* necessary components. **Centronics Interface Kit.**

# Save money! Pinpoint power line problems *and* get surge protection with one low-cost monitor!

Right in the middle of a big job a glitch suddenly shuts down your computer. Another expensive service call? No!

**Now there's a better way.**

Inmac's new power line monitor, tells you *instantly* if power fluctuations are to blame and identifies the specific problem.

You quickly scan our checklist and find the solution . . . without calling in a high priced technician!

---

***A few of the companies now using Inmac power line monitoring products:***
**AT&T • Atari • Bell Laboratories • Bendix Corp. • Hughes Aircraft • New York Times • U.S. Dept. of Commerce • Xerox Corporation**

---

**Warns visibly and audibly.**

The monitor's bright red LED indicators register high and low line voltage, voltage spikes and voltage drops.

If operators don't see the warning panel, a beeping alarm alerts them to act before equipment is damaged or data lost.

**Has surge protection, too!**

And with the power line monitor at work, chances are you'll have *fewer* shutdowns altogether.

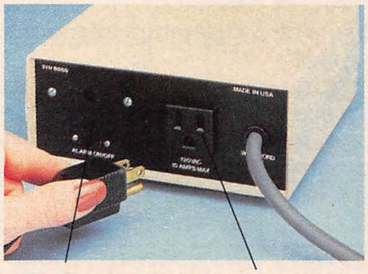
That's because the monitor intercepts power surges above 150 volts *before* they can weaken or destroy circuitry.

Just plug your computer into the monitor's convenience outlet. A green status light reassures you that your equipment is getting "clean" power.

**Dramatic cost savings.**

Before now, you'd have had to pay $1,000 to $2,000 for a device that identifies power problems . . . and another $100 or more to protect against surges.

Now you can get both for just a *fraction* of the cost . . . just $285 complete! Order this time and money saver today.



*When AC power fluctuates, soft beeping alarm warns operators to take corrective action to protect equipment and data.*

*Once your computer is plugged into the monitor's surge protected outlet, you can forget about damage from spikes and transients.*

*Diagnosing power line problems has never been easier.*

**Power Line Monitor.** 6' AC power cord. Dim: 6" x 2½" x 6¼". Wt. 1 lb. 9 oz. Beige.

| Qty. | 1 | 2–4 | 5–9 |
|---|---|---|---|
| **No. 6669P2** | **$255** | **$240** | **$235** |

### Specifications

| | |
|---|---|
| **Power requirements** | 120 VAC, 60 Hz, 3.6W |
| **Temperature range** | 32° to 120° F (0° to 50° C) |
| **Indicator response** | |
| Voltage transient/ spike | 5 micro seconds, 148 V RMS |
| High line voltage | 1 second at or above 130 V |
| Low line voltage | 1 second at or below 100 V |
| Voltage drop | .08 seconds at or below 90 V |
| **Surge/transient-protected outlet** | |
| Clamping level | 150 V RMS |
| Power dissipation | 100 joules |
| Response time | nominally 5 nanosec. |

*This monitor can make troubleshooting fast and inexpensive.*

# How to safely get power to your peripherals.

Electrical outlets *always* seem to be in short supply. Especially when you have CRTs, floppy drives and printers all located in the same area. Here's the practical solution.

**Six outlets *with* circuit breaker protection.**

This hefty Multiple Outlet Extension features a self-activating, 15-amp circuit breaker that automatically shuts off the power whenever problems occur. So, no matter how many peripherals are plugged in, you don't have to worry about overloading or short circuits.

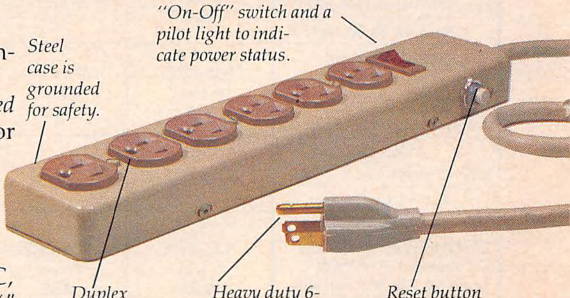
**The best safety value we've found.**

It's loaded with extras. Like an "On-Off" power switch and a pilot light.

The unit's heavy steel case is *grounded* for safety and has two keyhole slots for mounting (screws included). It's U.L. Listed and exceeds National Electrical Code requirements.

**Multiple Outlet Extension.** Beige steel case. Max. rating: 15 amps, 125 volts AC, 60 Hz, 1875 watts continuous duty. 13⅛" l. x 1⅝" h. x 2⅜" w. Wt. 3 lbs.

| Qty. | 1 | 2–4 | 5–9 |
|---|---|---|---|
| **No. 6680P2** | **$39** | **$36** | **$34** |



*Rocker switch serves as an "On-Off" switch and a pilot light to indicate power status.*

*Steel case is grounded for safety.*

*Duplex "U" ground, 3-prong outlets.*

*Heavy duty 6-foot 3-wire cord with 3-prong plug.*

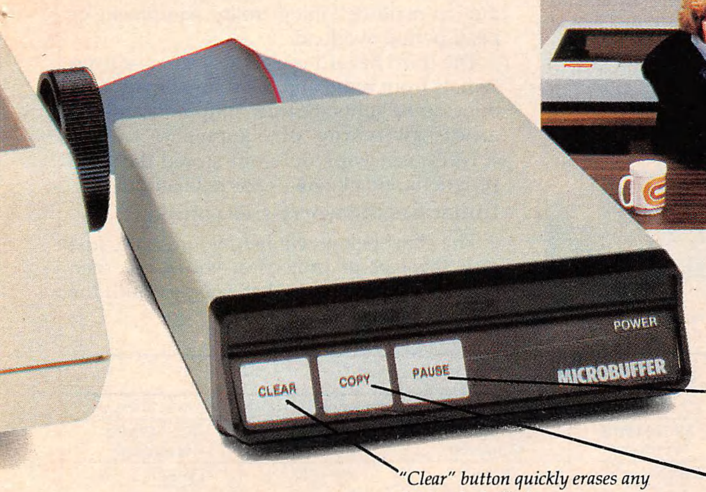
*Reset button in case of short circuits or overloads.*

Convenient Order Form on Page 48

# Save time! Use your computer while printing!

Losing precious time while your printer uses your computer? Inmac's Microbuffer turns waiting time into working time!

The Microbuffer stores data as fast as your computer dumps it, then releases it at your printer's slower rate while you do other projects on your computer.



"Clear" button quickly erases any data in the buffer's memory.

Pause control allows temporary suspension of printing.

Copy the last printed document up to 255 times at the touch of a button.

*Parallel version includes buffer-to-printer cable.*

**Works with most pupular equipment.** Use the microbuffer with virtually any microcomputer including IBM, Apple, TRS-80 . . . and Epson, NEC, Diablo, C. Itoh and Okidata printers.

*If your printer is wasting valuable computer time, you need our Microbuffer!*

Choose a serial or parallel interface with 32K or 64K bytes of storage. You can even upgrade to 256K . . . call for details.

The parallel version comes with its own 6′ cable. For the serial version, order Inmac cable #310-2 listed on page 33.

Get your timesaving Microbuffer today!

**32K Serial Microbuffer.** Has bypass feature for instant printer access, AC adapter. 5⅜″ x 7¾″ x 1⅝.″ 1 lb. Beige.

| Qty. | 1 | 2-4 | 5-9 |
|---|---|---|---|
| **No. 8091P2** | **$320** | **$299** | **$286** |

**64K Serial Microbuffer.** Same features as 32K version, plus twice the memory.

| Qty. | 1 | 2-4 | 5-9 |
|---|---|---|---|
| **No. 8093P2** | **$379** | **$365** | **$355** |

**32K Parallel Microbuffer.** Includes AC adapter and 6′ buffer-to-printer cable. 5⅜″ x 7¾″ x 1⅝.″ 1 lb. Beige.

| Qty. | 1 | 2-4 | 5-9 |
|---|---|---|---|
| **No. 8090P2** | **$320** | **$299** | **$286** |

**64K Parallel Microbuffer.** Same features as 32K version, plus twice the memory.

| Qty. | 1 | 2-4 | 5-9 |
|---|---|---|---|
| **No. 8092P2** | **$379** | **$365** | **$355** |

# System Controller lets you turn your entire system on or off with just one switch and protects against surge, too!

You can get the convenience of master power switch control—and the peace of mind that comes from *knowing* everything is turned off with Inmac's new System Controller.

It's easy to use. Decide which component you want to control your system, and plug it into the controller's master outlet. Plug up to four other perhipherals into the controller's remaining outlets.

*Once the System Controller is configured to your satisfaction, you can put your Controller conveniently out of sight—thanks to its six-foot power supply cord.*

Every time you flip the "master" component power switch on, your system is powered up. Two indicator lights tell you the power is on and the surge protector is functioning.

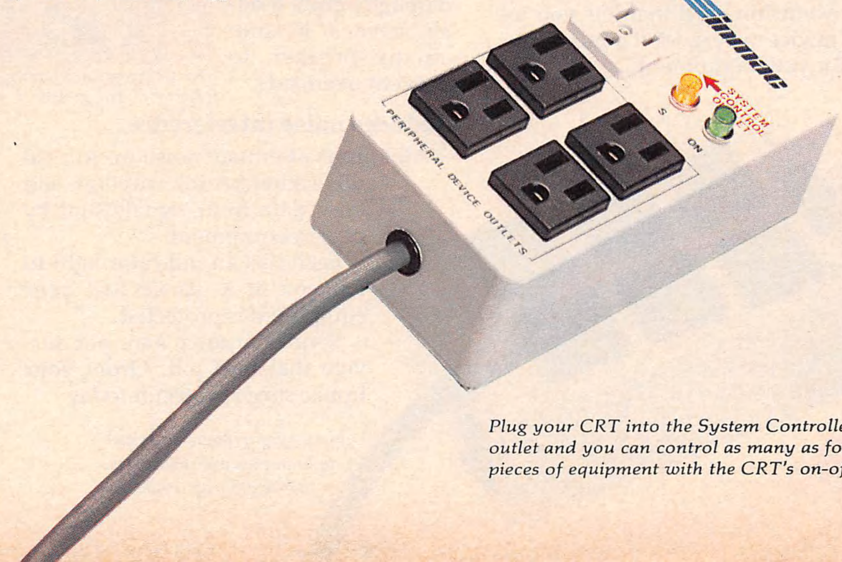
The System Controller is complete with a six-foot grounded power supply cord, so you can make your connections and then put it out of sight for a neater, more professional appearance.

**Note: Accommodates trickle current components if the component is plugged into the master outlet.*

You'll never again have to wonder if you turned everything off when your micro and peripherals are controlled by your System Controller. Order yours today!

**System Controller.** 5¾″l. x 3″w. x 2¼″d. Wt. 16 oz. 6′ grounded powercord.

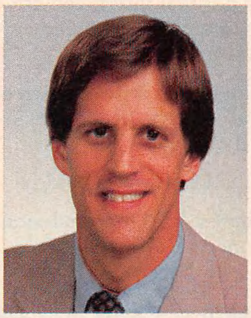
| Qty. | 1 | 2-4 | 5-9 |
|---|---|---|---|
| **No. 6648P2** | **$139** | **$135** | **$129** |



*Plug your CRT into the System Controller's master outlet and you can control as many as four other pieces of equipment with the CRT's on-off switch!*

Convenient Order Form on Page 48

# The truth about "120 volt" power and your computer.



*"Some experts estimate that power irregularities cause up to 70% of the typical computer malfunctions. Use one of the Inmac power line conditioners on these two pages and save all that time, trouble and expense."*

**Ron Becht**
*Product Manager*

Plugging your expensive computer directly into a "harmless" wall socket can be like hooking it up to an electric chair.

Momentary variations of thousands of volts can occur daily. Even the *least* of these can wipe out memory, misregister programs, and trigger circuits falsely.

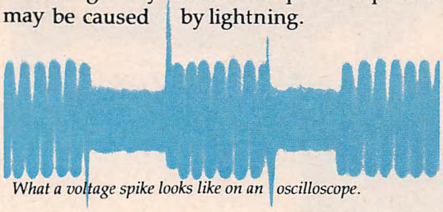
The strongest could short out your peripherals and power supply.

Damage may not show immediately, but repeated exposure shortens your components' life, ultimately costing you thousands of dollars in repair and downtime.

**Know the 3 major types of trouble.**

The most common hazard is a voltage *surge*, a burst of AC power of up to several thousand volts. Short, very powerful surges are called *transients* or *spikes*.

Both are caused by the on/off action of electrical motors or by utility company load switching. They often follow power dips and may be caused by lightning.



*What a voltage spike looks like on an oscilloscope.*

Though lasting only fractions of a second, they can destroy microcircuits, cause contact pitting in disk drive relays and even erase entire memory blocks.

Blackouts and brownouts pose the second danger, *undervoltage*, which can wipe out valuable data stored in memory. Blackouts are common in storm areas; brownouts are often due to malfunctioning utility equipment or peak-period overload.

The third hazard is electrical *noise*—carrier signals from radio and television broadcasts, fluorescent lights, nearby computers and the on/off switching of equipment.

Noise can wipe out your stored data and programs and generate false data output.

**Inmac has the worry-free solution.**

The chart below will help you decide. Just pick the *type* of protection you need, then choose the product in that category with the features you prefer.

## Inmac Power Line Conditioners

| | Best Surge Protection | | | | Best Noise Protection | | Power Backup |
|---|---|---|---|---|---|---|---|

# Get dependable Inmac surge protection. . .and relax!

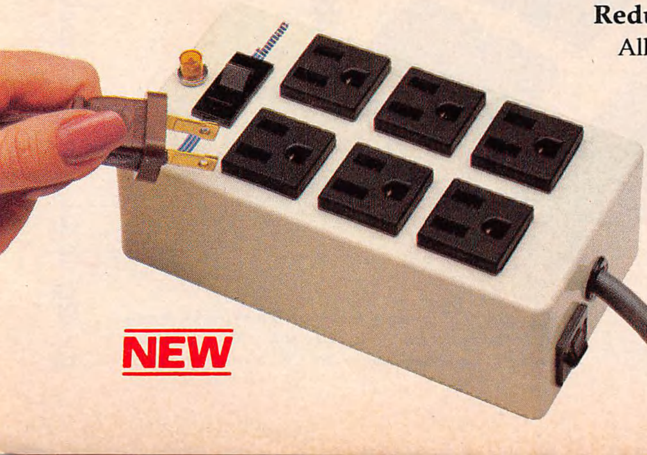
Inmac surge protectors are your insurance against computer failure due to AC voltage spikes and surges.

They clamp and safely dissipate dangerous electrical pulses above 200 volts (±5%) in just .1 nanosecond.

**Four models to choose from.**

The 1-outlet and 2-outlet models plug directly into a grounded wall socket.

The 4-outlet and 6-outlet versions have a 6-foot extension cord that lets you locate the device wherever it's most convenient for your equipment.



NEW

These two multi-outlet units also feature a master on/off switch that lets you power all components centrally.

If the power dips below 90V, the 4-outlet surge protector automatically shuts off power to prevent equipment damage. Both models have a 10 amp circuit breaker to prevent overloads.

*The two larger units feature a master control switch.*

**Reduces noise interference.**

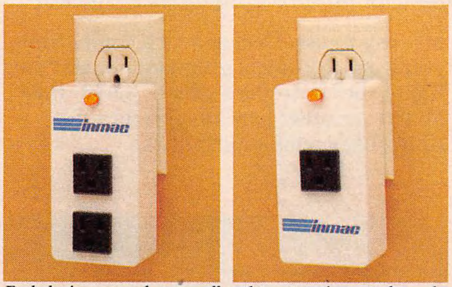
All 4 units attenuate noise up to −40 dB to minimize interruptions and false data from signals sent by nearby equipment.

Each has an indicator light to tell you at a glance that your equipment is protected.

Your computer may not survive that next jolt. Order your Inmac surge protector today.

*Inmac surge protectors give you insurance against voltage spike damage to your components.*

**1-outlet Surge Protector.** Dim: 4¾"h. x 2½"w. x 1½"d. Wt. 5.8 oz.



*Each device uses only one wall outlet, yet equipment plugged into the adjacent outlet is also protected.*

| Qty. | 1 | 2–4 | 5–9 |
|---|---|---|---|
| **No. 6641P2** | **$89** | **$82** | **$78** |

**2-outlet Surge Protector.** Dim: 4¾"h. x 2½"w. x 1½"d. Wt. 5.8 oz.

| Qty. | 1 | 2–4 | 5–9 |
|---|---|---|---|
| **No. 6643P2** | **$99** | **$91** | **$87** |

**4-outlet Surge Protector.** Dim: 6"h. x 3"w. x 2"d. Wt. 16.1 oz. 6' line cord.

| Qty. | 1 | 2–4 | 5–9 |
|---|---|---|---|
| **No. 6644P2** | **$145** | **$133** | **$128** |

**6-outlet Surge Protector.** Dim: 6"h. x 3"w. x 2"d. Wt. 14.9 oz. 6' line cord.

| Qty. | 1 | 2–4 | 5–9 |
|---|---|---|---|
| **No. 6646P2** | **$150** | **$143** | **$138** |

# Noise-filtering surge protectors for "clean" power.

These double-duty surge protectors guard against transient peaks and voltage spikes while they clean the AC power en route to your computer of electromagnetic and radio frequency line noise that can generate false data and static.

Unwanted energy is stored in capacitors or inductors and slowly dissipated either as heat or back through the ground wire.

The result is the "clean line" specified for reliable performance of your electronic equipment.

**Two models to choose from.**

Choose the wall-mount unit to protect two components or the deluxe model for greater capacity and convenience. Both feature 3-prong grounded outlets.

The deluxe model guards 8 devices and has individually switched outlets and a main on/off switch that lets you centrally configure power to components. An indicator light tells you the power status at a glance.

*Our 2-line grounded outlet protects two devices against dangerous AC line interference. No. 6676*

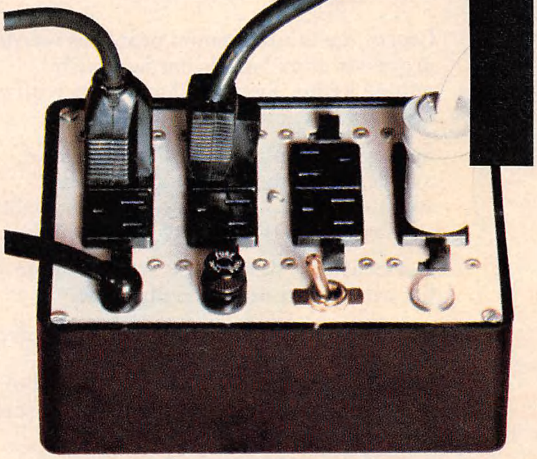
**Noise Filtering Surge Protector: 2-outlet.** 120 Volts, 60 Hz.

| Price each | Qty. 1 | 2-4 | 5-9 |
|---|---|---|---|
| No. 6676P2 | **$109** | **$100** | **$96** |

**Noise Filtering Surge Protector: 8-outlet.** 120 Volts, 60 Hz.

| Price each | Qty. 1 | 2-4 | 5-9 |
|---|---|---|---|
| No. 6677P2 | **$149** | **$137** | **$131** |

***Mini-Micro Systems* says of this type of line-cleaning device: ". . . its cost is negligible compared to the losses generated by just one system failure due to an AC power line noise event."**



*No. 6677 has 8 individually switched outlets.*

## Six-outlet console mounts anywhere!

This versatile, heavy-duty console delivers power to six components via safe, industrial style, grounded outlets.

You can mount it on your wall at a convenient height up to 6 feet from the power outlet, or use it as a portable extension cord.

**Easy, one-switch control.**

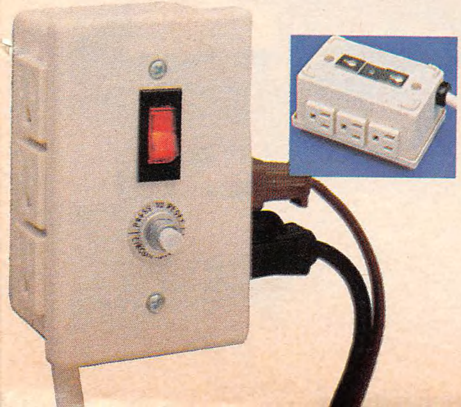
A single switch lets you centrally control all 6 outlets from one location. It lights when in the "on" position, so you know the power status at a glance.

Overloads are automatically terminated by a 15 amp circuit breaker, that prevents dangerous hot wires. You reset it at the touch of a button.

**Multi-outlet Power Center.** 15 amp circuit breaker. Rated to 125 volts. 6' line cord. UL approved. Color: almond.

| Qty. | 1 | 2-4 | 5-9 |
|---|---|---|---|
| No. 6682P2 | **$27** | **$25** | **$24** |

*The multi-outlet power center gives you six heavy-duty outlets in a compact, versatile console. Mount it on a wall or use it as a portable extension cord.*



## Datasaver keeps you in business when the lights go out!

Within one second after a power failure your computer may lose your stored data forever. Our uninterruptible power supply prevents that expensive loss.

It activates within 12 milliseconds of a power interruption, giving you plenty of time to save your data before your system shuts down.

The battery recharges automatically after power is restored.

**Screens out destructive transients.**

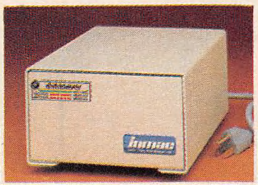
When it isn't supplying power, the Datasaver's voltage surge and noise suppressors keep the line clean.

The unit supplies up to 120 watts of power and is designed for 1 amp of current – enough for most micros. (Caution: Datasaver is not designed to accomodate printers and/or fixed drives.)

Check your system's power requirements carefully, then call us before it's too late.

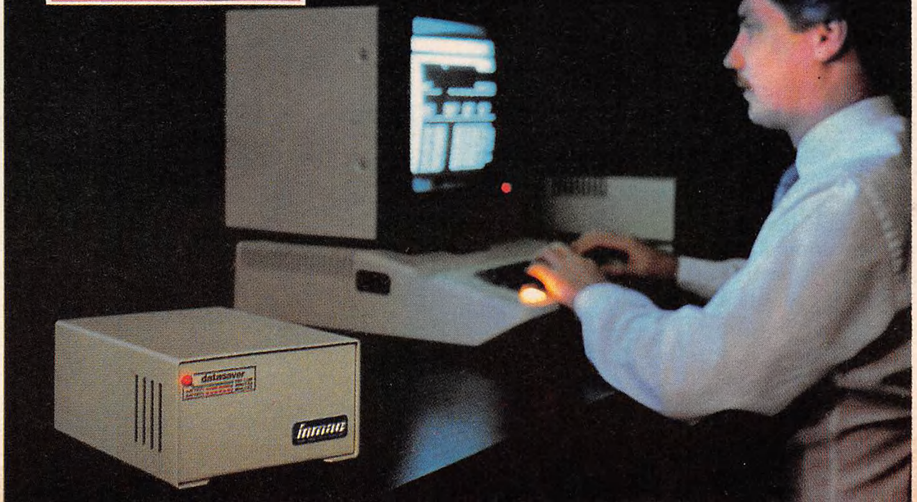
**Micro UPS-Datasaver.** Includes 6' line cord, 2 grounded outlets. Dim: 4"h. x 6"w. x 9"d. Wt. 11 lbs. Color: beige.

| Qty. | 1 | 2-4 | 5-9 |
|---|---|---|---|
| No. 6678P2 | **$485** | **$470** | **$460** |



*Compact unit takes up little desk space.*

*Replacing lost data is tedious . . . sometimes impossible! Datasaver's "reserve tank" of power saves you the trouble and expense.*



Convenient Order Form on Page 48

# Our DataMaster™ furniture system lets you custom design your own neat, well-organized Word/Processing workstation.

One of the most common problems word/processor users have is harmoniously uniting highly specialized machines with ordinary office furniture.

Sure, you can place your line printer on a table, or balance your terminal on a secretarial desk... but it doesn't look right and it won't perform up to its capability.

**DataMaster is designed to accommodate the word/processor's eccentricities.**

By virtue of its unique function, computer equipment has specific furniture needs. Inmac's DataMaster system is designed to accommodate these eccentricities with such special features as—

- knockout wiring ports in the modesty panels on most modules to keep cables in place but out of sight;
- sturdy 10" shelves to provide out-of-the way storage for manuals, modems and personal items; and
- roomy, 30" deep tops in your choice of widths assure an adequate work surface for monitors, printers, reference materials, source documents and copy holders.

Our DataMaster system is proof that functional, well-built furniture also can be highly attractive.

The sleek, contemporary lines look sharp in any setting, and you can choose from two popular color schemes. "Traditional" features walnut-grained work surface and module doors accented by black trim. "Contemporary" features oak-grained table tops and module doors accented by putty colored trim.

All tops are self-edged for that expensive look you'd expect to pay a good deal more to obtain.

**Comfort adds up to efficiency.**
Most computer activities require absolute concentration... and it's a lot easier to concentrate when you're comfortable. We've designed each piece of DataMaster furniture with this in mind.

Our machine height modules measure 26½" from floor to work surface, the recognized standard for keyboard comfort, efficiency and accuracy. We also offer 29½" high desk modules for tasks like report writing.

Adjustable leveling glides on all base corners compensate for uneven floors and minimize vibrations that can cause keying errors or even damage sensitive machines.

And because the DataMaster system is modular, you can switch components from side to side to compensate for right or left handed orientation, existing light sources or room configuration.

**Design your word processing workstation in six easy steps.**
Inmac has simplified the task of selecting word processing furniture to six easy steps.

First, decide if more than one user will have access to the terminal. If so, select a "quick access" module. If not, select a "dedicated workstation" module.

Second, select the height you need—26½" for sit-down keyboard work; 29½" for writing and editing.

Third, choose the size work surface you need. Measure where it will be placed, the equipment you will place on it and the amount of working space you need.

Fourth, select the color scheme you like best—traditional rich walnut or contemporary bright oak.

Fifth, order the accessories and returns to give you the space and configuration you need. One of the most popular and efficient wordprocessing configurations is illustrated.

Sixth, write or phone in your order today. Our DataMaster furniture is so well made it's guaranteed for a lifetime. If anything should ever go wrong with it, return it for a prompt, free exchange.

**Look for this red dot to maximize your savings.**
• When making your selection from our order chart on page 41, look for the red dot in the discount column. If your order includes 3 or more "red dotted" items (in any combination) you are eligible for an 8% discount from your total DataMaster furniture order. If ordering 12 or more, call Inmac for additional discounts.

*A. Place your terminal, typewriter, dictaphone and copy holder on this surface, our 72" long, 26½" high workstation (#3918).*

*B. A matching-length overhead riser (#3930) provides convenient, armlength storage for binders, floppies and documentation.*

*C. By attaching printout trays (#3932), small item organizers (#3933) and a V-form paper handler (#3931) to the riser, you can free up valuable work-space on your desk.*

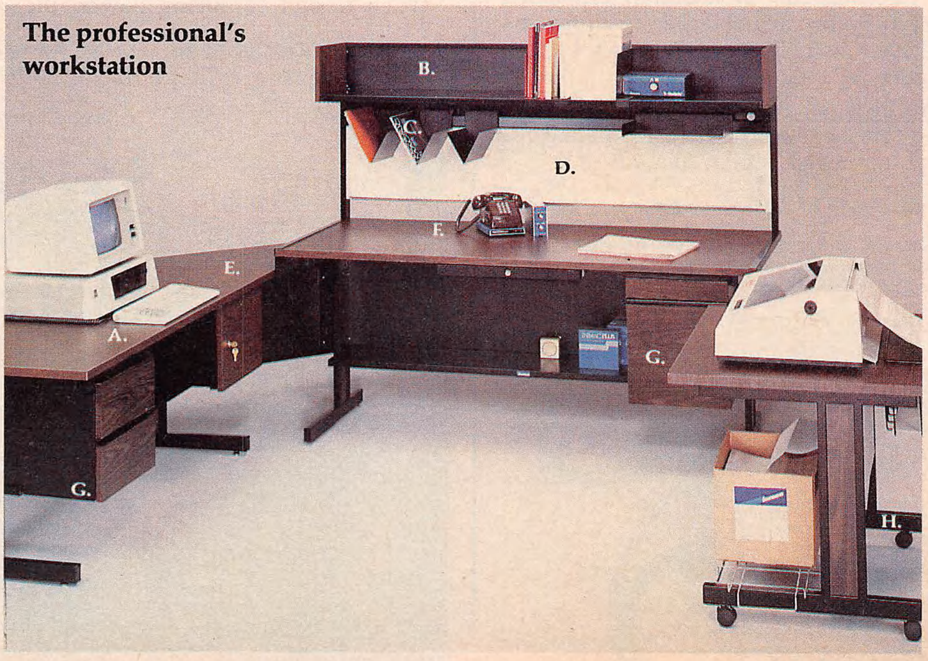
*D. A write-on wipe-off board (#3937 or #3938) serves as a reusable note board and privacy partition.*

*E. Connect different height work surfaces with a 90 triangle connector (#3950).*

*F. Specify a 29½" high workstation (#3916) for regular desk work, and a center drawer (#3951) with optional lock (#3953) holds needed writing supplies.*

*G. A fixed pedestal (#3967) for 29½" high modules, with file and pencil drawer (#3966) for 26½" high modules, with 2 box drawers can be ordered with a lock (#3968); or you can choose a mobile pedestal (#3965) with file and box drawer. All file drawers holds letter or legal size hanging files or bound printout.*

*H. Put your printer on a large printer stand (#3907) to feed continuous forms to your printer.*



**The professional's workstation**

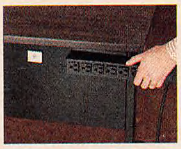
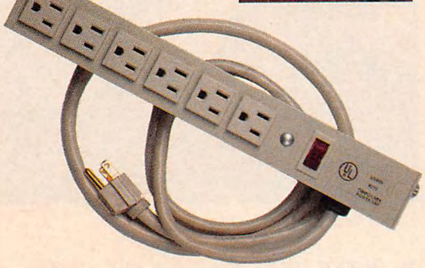
## Self-stick power strip ends cord clutter and cable managers eliminate tangles .

**Power strip**
This 9′ extension puts a power pack at your computer to feed your CPU, monitor, printer, lamp—six outlets, in total—from one wall outlet.

Safety features include a 15 amp circuit breaker, master on/off switch, pilot light, grounded steel case and three-pronged outlets.



*Six-outlet strip attaches to desk and safely provides power to all your microcomputer equipment.*



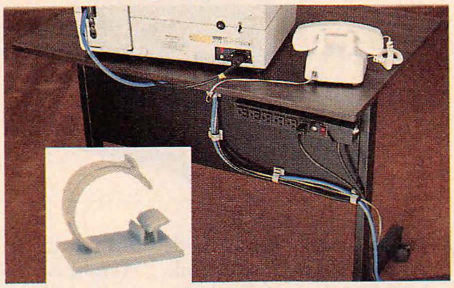
**Power Strip.** Wt. 2 lbs.

| Qty. | 1-2 | 3-5 | 6-9 |
|---|---|---|---|
| 3446-7P2 Black | $39 | $36 | $34 |
| 3446-8P2 Brown | $39 | $36 | $34 |

**New Cable Manager**
Our handy Cable Managers hold three or more large cables, plus telephone and power cords, in a locking ring that fits almost anywhere.

Adhesive foam backing secures the Cable Manager to your CRT stand, desk, wall or baseboard. And you don't need to drill holes or drive nails—just peel and press.

The Cable Manager is the easiest and fastest way to keep your cables and cords neat—and it unlocks easily when you want to move equipment or recable. 1″ width cable capacity. Gray.



**Cable Managers.** Set of 6. Wt. 7 oz. 1″ width cable capacity. Gray.

| Qty. | 1 | 2-5 | 6-10 |
|---|---|---|---|
| 3448P2 | $7.95 | $6.95 | $6.50 |

## Extension outlets improve safety and make organizing easier.

It's much easier to organize your office—and safer, too!—when you use Inmac's pre-wired extension outlets.

Available in two convenient lengths and two colors, they provide the perfect solution to inconveniently located outlets. Made of heavy duty rubber, the cover's ribbed bottom helps to hold it in place on all types of floors. You won't trip or accidently yank your expensive PC, printer or CRT off your desk.

Order today, and start planning to put your personal computer where it looks and performs best!

# With versatile Datamaster furniture housing all your personal computer equipment, you'll work faster and better.

You'll work faster because our stylish DataMaster furniture can put all your personal equipment—including important accessories—within immediate reach, without getting out of your chair. And with everything positioned for your comfort and ease of movement, you'll work better, too!

We've illustrated two of the most efficient configurations for PC users.

Both use our model 3910 DataMaster PC stand that's 30″ deep, 36″ wide and 26½″ high. It has a sturdy, 1″ thick top and a 10″ undershelf that can hold a modem, diskettes or personal items. Leveling guides compensate for uneven flooring as well as reduce vibrations that can damage sensitive equipment. (If you need a PC stand on casters, see our exclusive MicroMaster system on page 2.)

**Our adjustable backshelf adds versatility and comfort.**

Inmac's exclusive backshelf model #3970, which attaches in seconds to our PC stand, lets you add versatility and comfort. The shelf, as wide as the stand (36″), 12″ deep and 13″ high, is height adjustable in ¾″ increments from 7″ to 12″. In addition, the backshelf's completely adjustable viewing angle holds your PC monitor at the most comfortable and glare-reducing angle to eliminate stressful neck and shoulder fatigue. The backshelf is big enough to hold your monitor—and media, documentation, a modem or other items.

Two matching printer stands are available. Almost any size printer, with or without a sound cover, fits on our large printer stand, which measures 30″ deep, 36″ wide and 26½″ high. Used side by side with our PC stand, it forms one continuous work surface.

For smaller printers, or those without a sound cover, our smaller printer stand, at 24″ deep, 30″ wide and 26½″ high, needs even less space.

For even more worksurface and greater versatility, connect your DataMaster PC stand with the large printer stand using a 90 degree connector model #3950. You'll be pleased by the extra convenience!

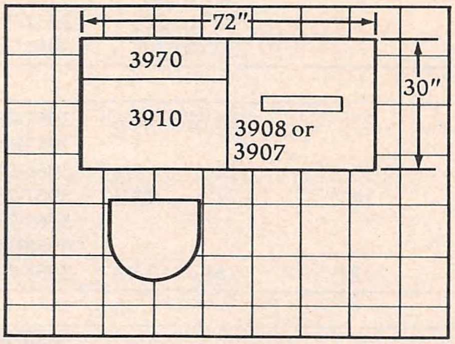
Our DataMaster furniture is easily assembled with a Philips head and a slotted head screwdriver. And it's guaranteed for a lifetime.

To order, select the furniture you need now. (Inmac's modular system means you can add on later, if you add equipment or change your needs.)

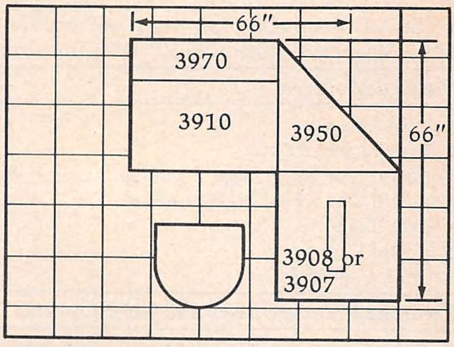
Choose from two popular color schemes.

"Traditional" features walnut-grained work surface accented by black trim. "Contemporary" features oak-grained table tops accented by putty colored trim.

Then call us. We'll give your order our immediate attention and ship it to you promptly. Call now!



*For maximum side-by-side efficiency, a DataMaster PC stand (#3910) and matching printer stand (available in two sizes to fit regular and large printers, 3908 and 3907) provide plenty of work space, while our exclusive backshelf (#3970) holds your monitor, media, modem and other items.*



*To add even more worksurface and gain extra versatility, connect your DataMaster PC stand to either printer stand you order with our 90 degree connector (#3950). It's available in the same choice of colors and finishes as your other DataMaster furniture.*

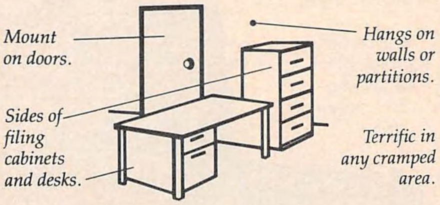
# Now . . . wasted wall space becomes a handy filing center!

*Ready Files mount easily on nearly any vertical surface.*

Ready Files keep frequently used reference materials, reports – even big computer printout – where you need them . . . without taking an inch of your desk space!

Hang them on walls, cabinets, copiers . . . they come with hardware for mounting on just about *any* vertical surface.

## Put Ready Files on office divider partitions to create instantly accessible storage



Mount on doors.
Hangs on walls or partitions.
Sides of filing cabinets and desks.
Terrific in any cramped area.

Their easy-access, easy add-on design is ideal for sorting bins, in/out boxes, literature displays, mail distribution centers and more. Order today, then write and tell us all the uses you find!

**Ready Files Set.** 3 pockets. Ea. 8½" h. x 15½" w. Wt: 5½ lbs. Smoke-tint acrylic. Includes screws, adhesive mounting strips & adjustable brackets for partitions 1⅛" to 2⅜" wide.

## This sturdy desktop copy holder is built to handle stacks of 132-column printout!

If you've ever tried keying from printout that flops over the sides of your standard size copyholder, you know how exasperating it can be.

This copyholder solves the problem. It's specifically designed to take the width and weight of printout, but holds smaller documents, too.

*Extra strong copyholder puts printout at your easiest viewing angle.*

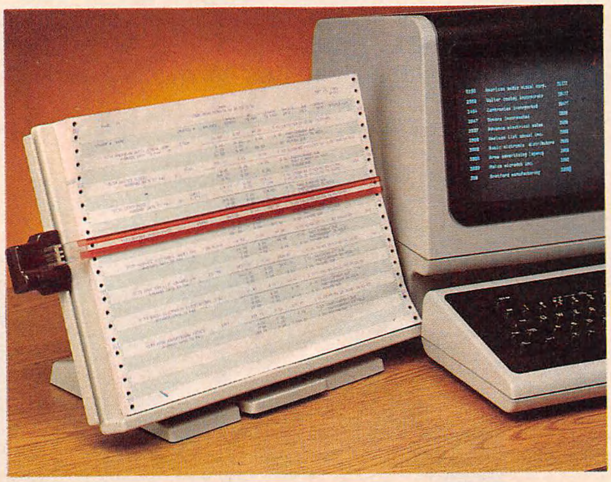
**Adjusts only when you want it to.**

It locks at any angle you choose—from nearly vertical to horizontal. Even under heavy stacks of printout, it won't collapse or change position.

Rubber feet prevent sliding or marring. A tinted guide mounts on either side for left or right handers and helps reduce errors and eyestrain.

**Heavy-duty construction.**

It's made of high-impact double-wall molded plastic with a non-glare finish. Because it has no magnets, you can use it near disks and tapes.



Order one of these copyholders and use it for 45 days. See how much easier it is to work with printout when you don't have to wrestle with it!

**132-column Desktop Copyholder.** Dim: 16"w. x 13"h. x 8½"d. Color: Beige. Wt. 3.3 lbs.

*Exhausts 15 cu. ft. of circuit-baking hot air per minute.*

*Compact Apple Saver protects your Apple from 3 enemies: heat, voltage surges and power switch failure.*

# Apple Saver keeps those extra cards from cooking your Apple.

Two or more peripheral boards added to your Apple II produce enough extra heat to "bake" delicate circuits.

Apple Saver's quiet fan pulls that heat out of your Apple, replacing it with cool air that prolongs your computer's life.

**Surge control at no extra cost!**

Surge protectors normally cost $100 or more. . .but the Apple Saver *includes* a built-in surge suppressor that clamps dangerous spikes above 130 volts RMS.

Just slide it into your Apple's ventilation slots. No tools are needed.

A front-mounted switch controls two convenient outlets so you can power up and protect your entire system at once.

Since you won't need to use your Apple's failure-prone power switch, you'll save the expense of replacing it.

Get an Apple Saver now. . .and relax!

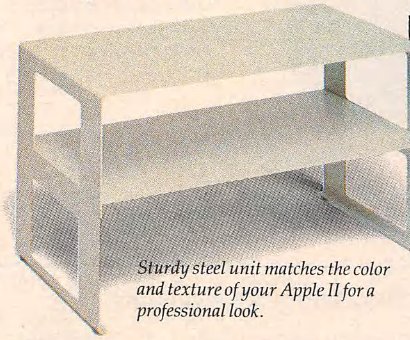
**Apple Saver.** 7½"l. x 2½"w. x 4¼"h. Wt. 3 lbs. Beige. UL listed. Fits Apple IIe.

| Qty. | 1 | 2-5 | 6-10 |
|---|---|---|---|
| **No. 2955P2** | **$99** | **$95** | **$89** |

---

# Access Apple components easily.

Our Applestand turns your makeshift pyramid into a convenient, professional-looking modular system.



*Sturdy steel unit matches the color and texture of your Apple II for a professional look.*

**Get to cables & circuitry quickly.**

It houses your computer, disk drives and most 12" monitors in the same space they now occupy.

The big difference is that your components rest on shelves so you can slide them out without dismantling your entire system.

Four large vents assure maximum cooling for longer circuit life. Order today for a better, safer system.

**Applestand.** 16"w. x 9"h. x 9"d. 9 lbs.

| Qty. | 1 | 2–3 | 4–9 |
|---|---|---|---|
| **No. 2950P2** | **$59** | **$54** | **$51** |

---

# Protect your Apple from theft, voltage spikes, overheating!

Computer theft is epidemic, and your Apple II may be next. But it never has to happen, thanks to Inmac's Station II.

**Easy one-switch control.**

Just secure Station II to a desk or stand. Plug your Apple II into one of three built-in outlets and slide it inside.

Lock it, and your Apple is safe from theft and internal damage. Your key controls all three built-in outlets so you can power up your entire system instantly.

The Station II's switch can handle the stress of rebooting, saving you costly replacement of Apple's power supply.

Plus, it automatically suppresses AC power spikes that can wipe out circuitry and programs. . .and *saves* you the $100 you'd have to pay for a separate device.

**Station II.** Dim: 6¼"h. x 18¼"w. x 11⅞"d. Fits Apple II and Apple IIe.

| Qty. | 1 | 2-5 | 6-10 |
|---|---|---|---|
| **No. 2951P2** | **$139** | **$129** | **$120** |

**Station II Fan.** Instructions included.

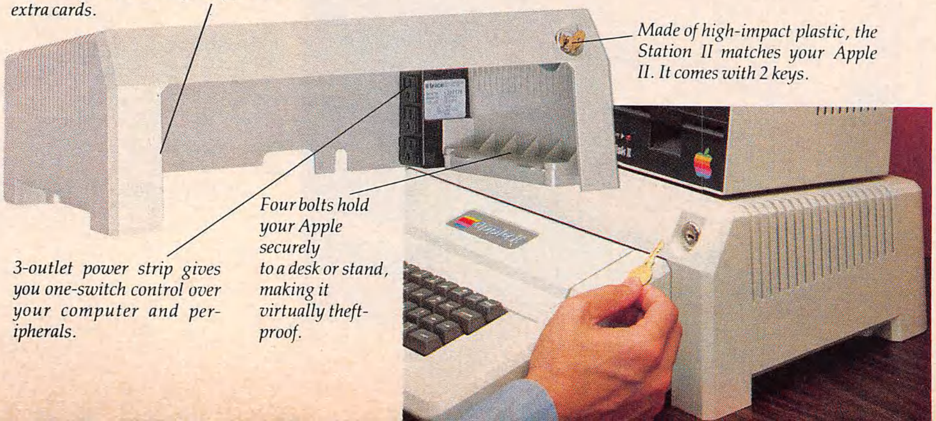
|---|---|---|---|
| **No. 2952P2** | **$49** | **$45** | **$43** |

*Optional fan is advised for Apples with extra cards.*



*Made of high-impact plastic, the Station II matches your Apple II. It comes with 2 keys.*

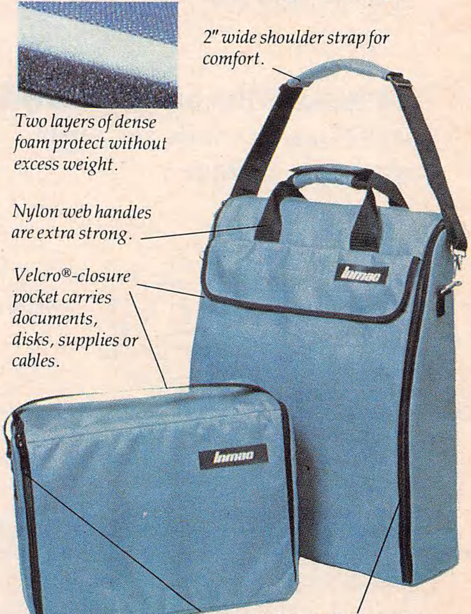
*3-outlet power strip gives you one-switch control over your computer and peripherals.*

*Four bolts hold your Apple securely to a desk or stand, making it virtually theft-proof.*

# Carry Apple II safely and comfortably!

A tear-proof Cordura® nylon shell and thick, high density foam padding make these the lightest, most comfortable cases for safely transporting your Apple II, Apple II Plus or Apple IIe computer and drives.

Wide-grip handles and a padded, adjustable shoulder strap are made of seat-belt strength webbing for safety.



*2" wide shoulder strap for comfort.*

*Two layers of dense foam protect without excess weight.*

*Nylon web handles are extra strong.*

*Velcro®-closure pocket carries documents, disks, supplies or cables.*

*Industrial strength zipper opens cases completely for easy loading.*

The matching drive bag includes a foam-lined "wallet" that protects cables and provides padding between drives.

Their tailored design rivals the best looking luggage. Order yours today.

# Your CRTs and printers are dust magnets. Here's how to protect them.

Static charges generated by your CRTs and printers *attract* dirt and dust like a magnet. This can lead to faulty operation, equipment shut-down or even damaged circuitry.

**Made with "Anti-Static" additives.**

These are no ordinary "office" dust covers. They're made of a *unique* vinyl containing special "anti-static" additives.

These hard-working additives prevent static-charge buildup, by immediately dissipating static charges *before* they reach the danger levels that cause sparks or arcing.

**They form an almost impregnable dust and food barrier.**

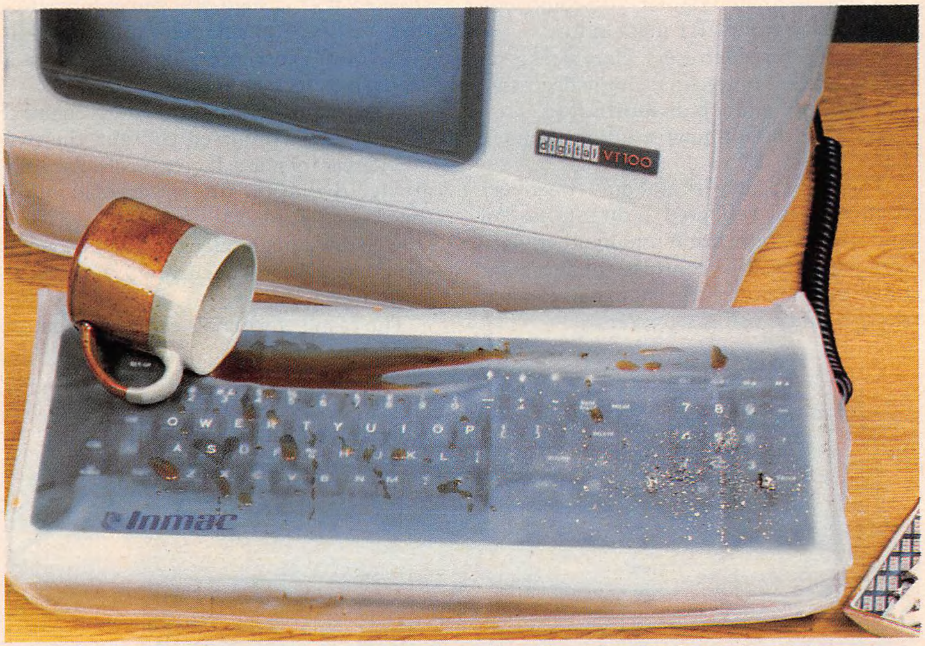
Their custom fit gives your equipment years of protection. You'll never have to worry about unforeseen hazards like spilled food, coffee or cigarette ashes.

Special rear cut-outs for cable routing help them fit snugly.

**All seams and edges are double-folded, then machine stitched.**

Each nylon stitch actually passes through six layers of heavy, 6-gauge vinyl. The result is unmatched strength and durability.

This unique vinyl is also unusually *flexible.* It neatly folds into an easily stored, compact bundle.



*Our "Anti-Static" Dust Covers give protection that even food, coffee spills and cigarette ashes won't penetrate.*

Inmac "Anti-Static" Dust Covers are a wise and inexpensive investment in the future of your equipment. Use the chart below to order one for each of your CRTs and printers.

## Banish CRT smudges with our economical Screen Cleaning Kit.

If you work with CRTs or micros, you know how *irritating* a dirty screen can be.

Vision-imparing contaminants like fingerprint smudges, dust and smoke particles quickly induce eye strain and can cause *severe* operator fatigue.

With our new Clean Cycle™ Screen Cleaning Kit, you can banish this problem in seconds. Simply apply a few drops of the *no-streak* cleaning solution to your screen. Then, wipe away the grime with our absorbent, lint-free cloths. To see for yourself, just add a kit to your next order.

**Clean Cycle Kit for CRT Screens.** Two 4-oz. bottles of cleaning solution, 50 wipes. **No. 7199P2**

| Qty. | 1 | 2-5 | 6-10 |
|---|---|---|---|
| **Ea.** | **$14.95** | **$13.50** | **$12.50** |

CRT Screen Cleaning Solution

*No-streak, OSHA-approved cleaning solution and lintfree wipes end CRT grime in seconds.*

Convenient·Order Form on Page 48

# Finally! A simple way to beat CRT glare while improving image contrast and sharpness!

If you ever have eye tension, headaches, or feel just a little "out of whack" after working at your computer, you could well be suffering from CRT glare stress.

Among computer users, glare stress can be a subtle but powerful factor in decreased productivity and job dissatisfaction.

**Presenting the ultimate solution: Inmac's Glare Sentry II.™**

The Glare Sentry II™ not only effectively reduces CRT-reflected light, it has an important feature not found in other glare screens: A built-in contrast enhancement filter that makes each character cleaner, sharper and much easier to read!

**Coated glass reduces reflections.**

The front glass surface of the filter is covered with a high-efficiency antireflection (HEA®) permanent coating that "swallows" most incoming light before it can reflect back at you.

Screen contrast is improved by a neutral density filter laminated between the two outer layers of glass. It gives each character greater definition for better readability than ever before.

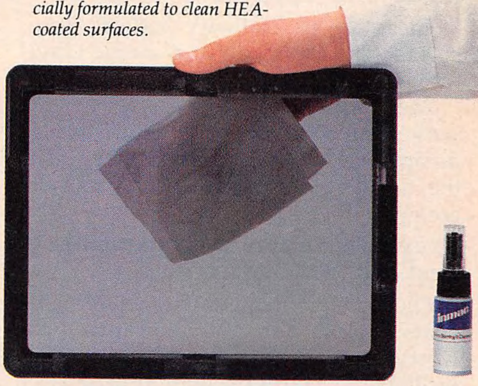
Even under high-intensity lighting, you'll see each symbol accurately... without straining!

The result: Terminals can be used more easily, comfortably, and for longer periods with optimal comfort.

**The best value you'll find.**

The Glare Sentry II is priced at only $99; yet, it out-performs screens and filters that cost much more.

*Free! A 1-ounce bottle of cleaner is included with your order. It's specially formulated to clean HEA-coated surfaces.*



**Easy to install and clean.**

Handy velcro strips secure the filter to your terminal screen and allow easy removal for cleaning.

Each filter comes with a free plastic pump bottle of cleaner, especially formulated to clean HEA-coated surfaces.

**Seeing is believing! Test it for 45 days on your own CRT.**

Order the Glass Sentry II filter today and try it on your own equipment. It's guaranteed to end stressful glare, even in the brightest light, or your money back.

**Cleaner Refill Kit.**

**No. 3129P2 . . . . . . . . . . . . . . . . . . . $9.95**

Glare Sentry II

## You CAN take your diskettes with you—if you carry them in our secure En Route™ Media Cases.

Of course you're careful with your floppy disks when you're using them. Contaminants and hard jolts can ruin media, produce data dropouts—or even cause headcrashes.

**But what can you do if you have to take your diskettes along?**
You can give them the care they deserve—Inmac's ultimate portable media protection, En Route cases. Here's why:

**1. Rugged outer shell for strength.**
Made of high-impact plastic, our cases for 8″ or 5¼″ diskettes have an extra-heavy grain that resists scuffing to retain their neat, professional appearance.

**2. Foam padding cushions media.**
The resilient urethane foam lining and removable dividers absorb shocks—and keep your diskettes "locked" in position for safety.

**3. Locks and seals for extra security.**
Both cases lock, and an aluminum valance with tongue-in-groove interlock effectively keeps out moisture and dirt.

*Carry up to 50 8″ flexible disks in this compact **En Route Floppy Case (#2707).***

**NEW**

*Our **En Route Floppy Case for 5¼″ disks (#2708)** keeps up to 100 disks safe from contamination and impact.*

**4. Compact and easy to carry.**
These easy to carry cases fit under an airplane seat. And even if you're traveling this week, it's not too late to get the protection of Inmac's En Route cases. Call us now, and we'll ship within 24 hours.

Caution: Do not expose your media to airport X-ray machines.

**En Route™ Media Cases**

| **En Route Floppy Case—5¼″** | 7½″ x 6½″ x 11″ | 2 lbs. | **2708P2** | **$49** | **$45** | **$41** |

## Compact cartridge and cassette files provide desktop safety and convenience.

Your data cartridges and cassettes, and the information they contain, are valuable investments of time and money.

Protect them with our cartridge file. Its heavy gauge acrylic cover protects up to 24 cartridges in a desk area smaller than a sheet of letterhead. Open, it displays your cartridges at a functional angle. Closed, each cartridge is cradled securely in a shock-proof slot.

**Mini Data Cartridge File.** Holds 24 mini cartridges. Dim. 9¼″ w. x 8¼″ h. x 10″ d.

| Qty. | 1 | 2-5 | 6-10 |
|---|---|---|---|
| **No. 2433P2** | **$39** | **$35** | **$32** |

*Slanted tray gives perfect viewing. Snug slots protect from jolts, keep tapes organized.*

Our cassette file provides 18 protective cells at just the right angle to identify and use your cassettes. The flip-back top of smoke-tinted acrylic adds to the efficient, professional looking appearance of your desktop. And the non-skid feet (on both files) keep them from sliding.

*Unique divider design holds 18 cassettes in protective cells. Compact base has non-slip feet for extra security.*

Whether you use cartridges or cassettes, you'll save time when they're organized... and protected at the same time. Make your work easier—order one today.

**Cassette File.** Dim. 9¾″ w. x 8¼″ h. x 10″ d. Holds 18 cassettes or **18 TI & Atari cartridges.**

| Qty. | 1 | 2-5 | 6-10 |
|---|---|---|---|

# Here's what you can expect from Inmac.

Below is just a sampling of the letters we get from computer users like yourself.

They've discovered that Inmac delivers the top quality products they need . . . and does it faster then anyone else!

---

**"Great service! I called up at 5:30 one Friday afternoon. We needed a breakout box. The branch manager handled my after-hours order and we had it the next day by noon."**

*– John Gambill, Operations Manager*
*Telecommunictions Design Corp.,*
*Santa Ana, CA*

---

**"I have never experienced such quick service from a supplier. You are to be congratulated for the speed with which you respond to customer requests. My original order was mailed on a Wednesday and the tape mailer was in my hands the following Monday. Incredible!"**

*– Irene Glessner, Accounts Receivable*
*Hercules Inc., Wilmington, DE*

---

**"Please accept my thanks for your quick delivery of the forms. I was desperate. Because of your attention to my small problem, I am telling everyone I know about you. Thanks."**

*– Bob Brunner, President*
*Precision Systems, Bridgeport, CT*

---

**"It's a pleasure doing business with your company. Your products are all high quality, and they're usually delivered the day after we order. With other suppliers, we've had to wait up to a couple of weeks. Inmac is at the top of a lot our lists."**

*– Steve Miller, Operations Supervisor*
*United Technologies, Foster City, CA*

---

**"I want to thank the personnel at the Inmac Schaumberg Distribution center for the expedition of our order. We were informed that the bulk cable on order normally would require an additional 2 to 3 weeks to ship. I was shocked to receive the entire order within one week from my phone call.**

**"I have dealt with many suppliers that promised 24-hour shipment. But your organization is the first to provide such quick response to an order. You are to be commended for living up to your advertised claims – and beyond my expectations."**

*– Robert Lindsey, Data Processing Mgr.*
*Lancaster City Schools, Lancaster, OH*

# Why PC users order with confidence from Inmac!

*Personal computer users from 435 of the Fortune 500 companies – and from hundreds of smaller companies, as well – rely on Inmac for quality products, dependable service and guaranteed satisfaction.*
*Here's why:*

## ☑ Assured Quality.

We put each product through relentless tests for performance and durability. If it doesn't meet or exceed industry standards, you won't find it in our catalog. And while most other suppliers have *no* specifications for their products, we're so committed to consistent quality, many of ours meet stringent military specs.

## ☑ Fast Shipment.

When you order supplies and accessories from other companies, you may wait 4 to 6 weeks to get them. But not with Inmac. With our 24-hour shipment, you'll get the products you need via low-cost surface freight within days of your order. Need it faster? Just give us a call and we'll get it to you overnight! Or come in and pick it up today!

## ☑ Easy Ordering.

You can order from each of our 7 sales and distribution centers by mail or phone. Verbal P.O.'s are welcomed. Each sales location is completely stocked to give you fast shipment and easy ordering with no minimum order requirement.

## ☑ A Helpful Staff.

For answers to technical questions, special orders or product compatibility, just pick up the phone and call your local Inmac sales center. Our friendly, knowledgeable staff will be happy to help you.

## ☑ Double Guarantee.

Because only you can judge whether the products you order from Inmac are right for your application, we offer you a two-way guarantee of satisfaction: A 45-day trial period, and a minimum 1-year performance guarantee on all products. Some are guaranteed up to a lifetime! No one else offers you this kind of protection.

## ☑ One-stop Shopping.

Your time is too valuable to spend hours searching through pages of source books. Rely on this easy-to-use catalog for all the computer supplies and accessories you need. With our standards of excellence, our unprecedented guarantees, and our super-fast service, you just can't go wrong. So give us a call today!

# How to order for fast, dependable service.

1. **Fill out the order form completely.** Even if you're phoning or TWXing your order, having all the information in front of you will save time and prevent errors.

2. **Always include your customer I.D. code.** You'll find it on the back cover, above your name on the mailing label.

3. **Credit is available on approval.** Speed your credit order by providing the name and address of your bank and 2 major trade references. Installment Terms: Half of invoice amount due NET 15 days; remainder due NET 30 days from invoice date.

4. **Send a check—save freight charges!** When you include a check with your order, *we* pay surface freight, within the continental U.S., on most items. IMPORTANT: See product pages for exclusions.

5. **Your order is normally shipped in 24 hours.** Most orders under 100 lbs. are sent via UPS or USPS, FOB our distribution centers, with freight and handling added to your invoice. Orders 100 lbs. and over are shipped via our choice of common carrier.

6. **Need it faster? We'll use overnight package service.** The overnight carriers are the fastest delivery services available. Call us by noon to place your order and to confirm your location in an overnight service area.

**Customers Outside USA: US Territories:** Order from nearest US branch, domestic terms.

**Canada and Mexico:** Pre-payment required in US $. Special freight/handling terms. Call or write nearest US branch for details.

## Mail, phone or TWX your order.

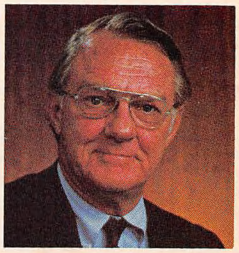
## INMAC'S DOUBLE-PROTECTION GUARANTEE OF YOUR SATISFACTION

*Every product you buy from this catalog must live up to your expectations, not ours. That's why we offer this unique, "DOUBLE-PROTECTION" Plan.*

*1. 45-Day No-Nonsense Trial Period. Any product in this catalog may be returned within 45 days if you're not completely satisfied. No hassles, no phone calls. Just send it back with proof of purchase to the nearest Inmac branch, freight prepaid, for prompt exchange, refund or credit. We would appreciate a note explaining why you are returning the product.*

*2. One-Year Replacement Guarantee. Except for consumable items (paper, ribbons, printwheels and filters), all catalog products are guaranteed for extended periods against defects in material and workmanship. Guarantee period is one year unless otherwise stated on product pages. If a product fails during this period, we'll promptly replace it. Just call your Inmac distribution center for an accelerated return number and return the product, freight prepaid.*

*Understandably, we cannot warranty damage resulting from misuse. Nor can we assume responsibility for consequential damage.*



If this is your first time ordering from Inmac, you're in for a pleasant surprise.

You'll find it's so easy to get what you want... so fast and refreshingly simple ... we think you'll just naturally turn to us every time you need supplies or accessories for your computer.

And you can order with complete confidence because we back every product we sell with the industry's strongest guarantee: You can use any item on a 45-day trial basis, and all non-consumable products are guaranteed for at least one year.

Our friendly, helpful customer service staff is backed by technical experts and fully stocked local warehouses. So you get the right products when you want them.

And we're not talking about 3-week lead times... we mean overnight delivery if you need it. It's the fastest service available anywhere!

So go ahead and mail or phone in your order. We'll make sure that the products and service you get meet or exceed your expectations... we want you to keep coming back.

Ed Faber
Group Vice President
Field Operations

# We select only tested, high quality products designed for personal computers.

This comprehensive INMAC catalog, which features the industry's highest quality supplies and accessories, is devoted exclusively to you, the personal computer user.

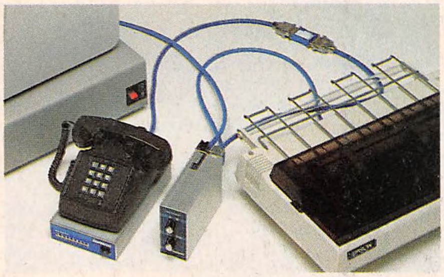
Regardless of the brand of your personal computer, you'll find INMAC's tested and fully guaranteed products are designed for you and your equipment—and for where and how you use your personal computer.

**Start by turning to page 9,** where INMAC's new Encore™ floppy diskettes are introduced with prices as low as $1.59 each!

If you're an Apple user, INMAC's innovative "Apple Saver" and other Apple-exclusive products are featured on page 44.

IMB PC users will be happy to see such specialized equipment as IBM document holders, CRT stands and dust covers on pages 4-5.

Radio Shack users will appreciate the choice of printer stands, furniture and other accessories on page 41-43.



And every personal computer user can take advantage of INMAC's single-source convenience for high quality Good Impressions™ ribbons, cables and connectors, power conditioners, cleaning kits, media storage and much more.

Regardless of your preference in personal computers—from Apple, IBM, Radio Shack and Commodore to DEC, HP, Atari, Osborne, Compag and Washington—INMAC's satisfaction-guaranteed products will enhance your personal computing efforts and increase your productivity.

Call us today for prompt, personal attention and immediate service!
